LIPIcs – Leibniz International Proceedings in Informatics

LIPIcs is a series of high-quality conference proceedings across all fields in informatics. LIPIcs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board

- Susanne Albers (TU München)
- Chris Hankin (Imperial College London)
- Deepak Kapur (University of New Mexico)
- Michael Mitzenmacher (Harvard University)
- Madhavan Mukund (Chennai Mathematical Institute)
- Catuscia Palamidessi (INRIA)
- Wolfgang Thomas (Chair, RWTH Aachen)
- Pascal Weil (CNRS and University Bordeaux)
- Reinhard Wilhelm (Saarland University)

ISSN 1868-8969

Contents

Preface

Lawrence S. Moss and Pawel Sobociński ........................................ vii

Regular Papers

Syntactic Monoids in a Category

Jiří Adámek, Stefan Milius, and Henning Urbat .................................................. 1

Extensions of Functors From Set to V-cat

Adriana Balan, Alexander Kurz, and Jiří Velebil .............................................. 17

Towards Trace Metrics via Functor Lifting

Paolo Baldan, Filippo Bonchi, Henning Kerstan, and Barbara König ................... 35

A Fibrational Approach to Automata Theory

Liang-Ting Chen and Henning Urbat ................................................................. 50

Canonical Coalgebraic Linear Time Logics

Corina Cîrstea .......................................................... 66

An Intensionally Fully-abstract Sheaf Model for π

Clovis Eberhart, Tom Hirschowitz, and Thomas Seiller ........................................ 86

Partial Higher-dimensional Automata

Uli Fahrenberg and Axel Legay ................................................................. 101

A Recipe for State-and-Effect Triangles

Bart Jacobs ................................................................. 116

Towards Concept Analysis in Categories: Limit Inferior as Algebra, Limit Superior as Coalgebra

Toshiki Kataoka and Dusko Pavlovic ................................................................. 130

Codensity Liftings of Monads

Shin-ya Katsumata and Tetsuya Sato ................................................................. 156

A First-order Logic for String Diagrams

Aleks Kissinger and David Quick ................................................................. 171

Presenting Morphisms of Distributive Laws

Bartek Klin and Beata Nachyla ................................................................. 190

Approximation of Nested Fixpoints – A Coalgebraic View of Parametric Dataypes

Alexander Kurz, Alberto Pardo, Daniela Petrișan, Paula Severi, and Fer-Jan de Vries .................................................. 205

Final Coalgebras from Corecursive Algebras

Paul Blain Levy ................................................................. 221

Uniform Interpolation for Coalgebraic Fixpoint Logic

Johannes Marti, Fatemeh Seifan, and Yde Venema ........................................... 238
Generic Trace Semantics and Graded Monads  
Stefan Milius, Dirk Pattinson, and Lutz Schröder .......................... 253

Open System Categorical Quantum Semantics in Natural Language Processing  
Robin Piedeleu, Dimitri Kartsaklis, Bob Coecke, and Mehrnoosh Sadrzadeh ...... 270

Modules Over Monads and Their Algebras  
Maciej Piróg, Nicolas Wu, and Jeremy Gibbons ................................. 290

Revisiting the Institutional Approach to Herbrand’s Theorem  
Ionuţ Ţuţu and José Luiz Fiadeiro .................................................. 304

Coalgebraic Infinite Traces and Kleisli Simulations  
Natsuki Urabe and Ichiro Hasuo ...................................................... 320

Finitary Corecursion for the Infinitary Lambda Calculus  
Stefan Milius and Thorsten Wißmann ............................................ 336
Preface

This volume contains the Proceedings of the 6th Conference on Algebra and Coalgebra in Computer Science, CALCO’15, held in Nijmegen, the Netherlands, 24–26 June 2015. Previous CALCO conferences have been held in Swansea (Wales, 2005), Bergen (Norway, 2007), Udine (Italy, 2009), Winchester (UK, 2011) and Warsaw (Poland, 2013). CALCO is a high-level, bi-annual conference formed by joining the forces and reputations of CMCS (the International Workshop on Coalgebraic Methods in Computer Science), and WADT (the Workshop on Algebraic Development Techniques). CALCO received 47 submissions. Of these, 21 papers were accepted.

The invited speakers at CALCO were Chris Heunen, Matteo Mio, Daniela Petrisan, and Andy Pitts. We thank them for their stimulating talks. In addition, CALCO has a tradition of Early Ideas talks, allowing presentation of work in progress and original research proposals. CALCO’15 had 11 Early Ideas talks.

We are grateful to the programme committee of CALCO for their hard work:

Andréj Bauer
Filippo Bonchi
Corina Cîrstea
Andrea Corradini
Ross Duncan
Martín Escardó
Dan Ghica
Helle Hansen
Ichiro Hasuo
Bart Jacobs
Bartek Klin
Barbara König
Dexter Kozen
Alexander Kurz

Paul-André Melliès
Stefan Milius
Lawrence S. Moss (co-chair)
Dusko Pavlovic
Daniela Petrisan
Damien Pous
John Power
Jan Rutten
Lutz Schröder
Monika Seisenberger
Alexandra Silva
Paweł Sobociński (co-chair)
Ana Sokolova
Andrzej Tarlecki

We also are pleased to thank the local organizers for their work in bringing such a wonderful conference to fruition: Alexandra Silva, Bart Jacobs, Nicole Messink, and Sam Staton.

Larry Moss and Paweł Sobociński

October 2015
List of Authors

Jiří Adámek
Institut für Theoretische Informatik
Technische Universität Braunschweig
Germany
j.adamek@tu-bs.de

Adriana Balan
University Politehnica of Bucharest
Romania
adriana.balan@mathem.pub.ro

Paolo Baldan
Dipartimento di Matematica
Università di Padova
Italy baldan@math.unipd.it

Filippo Bonchi
CNRS, ENS Lyon, Université de Lyon
France
filippo.bonchi@ens-lyon.fr

Liang-Ting Chen
Institut für Theoretische Informatik
Technische Universität Braunschweig
Germany
l.chen@iti.cs.tu-bs.de

Corina Cîrstea
ECS, University of Southampton
United Kingdom
cc2@ecs.soton.ac.uk

Bob Coecke
University of Oxford
United Kingdom
coecke@cs.ox.ac.uk

Clovis Eberhart
Université Savoie Mont-Blanc
France
