Technical Communications of the 32nd International Conference on Logic Programming

ICLP 2016, October 16–21, 2016, New York City, USA

Edited by
Manuel Carro
Andy King
Neda Saeedloei
Marina De Vos
OASIcs – OpenAccess Series in Informatics

OASIcs aims at a suitable publication venue to publish peer-reviewed collections of papers emerging from a scientific event. OASIcs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board

- Daniel Cremers (TU München, Germany)
- Barbara Hammer (Universität Bielefeld, Germany)
- Marc Langheinrich (Università della Svizzera Italiana – Lugano, Switzerland)
- Dorothea Wagner (Editor-in-Chief, Karlsruher Institut für Technologie, Germany)

ISSN 2190-6807

http://www.dagstuhl.de/oasics
This volume is dedicated to our families and loved ones, who managed to understand us doing what they really did not understand very well.
# Contents

Preface

Manuel Carro, Andy King, Neda Saeedloei, and Marina de Vos ................. 0:ix–0:xi

ICLP 2016: Technical Communications

SMT-Based Constraint Answer Set Solver EZSMT (System Description)

Benjamin Susman and Yuliya Lierler ............................................ 1:1–1:15

Theory Solving Made Easy with Clingo 5

Martin Gebser, Roland Kaminski, Benjamin Kaufmann, Max Ostrowski,
Torsten Schaub, and Philipp Wanko ........................................... 2:1–2:15

Computing Diverse Optimal Stable Models

Answer Set Programming for Qualitative Spatio-Temporal Reasoning: Methods
and Experiments

Christopher Brenton, Wolfgang Faber, and Sotiris Batsakis ................. 4:1–4:15

Rewriting Optimization Statements in Answer-Set Programs

Jori Bomanson, Martin Gebser, and Tomi Janhunen .......................... 5:1–5:15

Justifications and Blocking Sets in a Rule-Based Answer Set Computation

Christopher Béatrix, Claire Lefèvre, Laurent Garcia, and Igor Stéphan .... 6:1–6:15

Intelligent Instantiation and Supersafe Rules

Vladimir Lifschitz ................................................................. 7:1–7:14

An Answer Set Programming Framework for Reasoning About Truthfulness of
Statements by Agents

Tran Cao Son, Enrico Pontelli, Michael Gelfond, and Marcello Balduccini .... 8:1–8:4

Answer Set Solving with Generalized Learned Constraints

Martin Gebser, Roland Kaminski, Benjamin Kaufmann, Patrick Lühne,
Javier Romero, and Torsten Schaub ........................................... 9:1–9:15

PρLog: Combining Logic Programming with Conditional Transformation Systems
(Tool Description)

Besik Dundua, Temur Kutsia, and Klaus Reisenberger-Hugmayer ........... 10:1–10:5

Grounded Fixpoints and Active Integrity Constraints

Luís Cruz-Filipe ................................................................. 11:1–11:14

Constraint CNF: SAT and CSP Language Under One Roof

Broes De Cat and Yuliya Lierler ................................................. 12:1–12:15

Constraint Propagation and Explanation over Novel Types by Abstract
Compilation

Graeme Gange and Peter J. Stuckey ............................................. 13:1–13:14
A Compositional Typed Higher-Order Logic with Definitions

Ingmar Dasseville, Matthias van der Hallen, Bart Bogaerts, Gerda Janssens, and Marc Denecker .............................................................. 14:1–14:13

Inference in Probabilistic Logic Programs Using Lifted Explanations

ICLP 2016 Doctoral Consortium: Technical Communications

On the Expressiveness of Spatial Constraint Systems

Michell Guzmán and Frank D. Valencia .............................................. 16:1–16:12

Tabled CLP for Reasoning Over Stream Data

Joaquín Arias ......................................................... 17:1–17:8

Testing of Concurrent Programs

Miguel Isabel .......................................................... 18:1–18:5

Controlled Natural Languages for Knowledge Representation and Reasoning

Tiantian Gao .......................................................... 19:1–19:10

The Functional Perspective on Advanced Logic Programming

Alexander Vandenbroucke .......................................................... 20:1–20:8

Methods for Solving Extremal Problems in Practice

Michael Frank .......................................................... 21:1–21:6

Automating Disease Management Using Answer Set Programming

Zhuo Chen .............................................................. 22:1–22:10

Scalable Design Space Exploration via Answer Set Programming

Philipp Wanko .......................................................... 23:1–23:11
Preface

The Thirty Second International Conference on Logic Programming (ICLP’16) took place in New York City, USA, from the 16th to the 21st October 2016. The main conference track ran from the 18th to the 21st, and Doctoral Consortium took place on the 18th. This volume collects the Technical Communications corresponding to the presentations accepted to the Doctoral Consortium and the papers submitted to the main track of ICLP which the program committee judged of good quality, but not yet of the standard required to be accepted as conference full papers and published in the journal *Theory and Practice of Logic Programming* (http://journals.cambridge.org/action/displayJournal?jid=TLP). All the papers in this volume were presented in specific sessions of ICLP’16. In addition, the best Doctoral Consortium talk was given the opportunity to be presented in a slot of the main conference.

We solicited papers in all areas of logic programming, including:

- Implementation: Compilation, Virtual Machines, Parallelism, Constraint Handling Rules, Tabling.
- Language Issues: Concurrency, Objects, Coordination, Mobility, Higher Order, Types, Modes, Assertions, Programming Techniques.
- Applications: Databases, Big Data, Data Integration and Federation, Software Engineering, Natural Language Processing, Web and Semantic Web, Agents, Artificial Intelligence, Bioinformatics, and Education.

and, besides the papers for the Doctoral Consortium, we accepted three kinds of papers:

- Technical papers for technically sound, innovative ideas that can advance the state of logic programming;
- Application papers that impact interesting application domains;
- System and tool papers which emphasise novelty, practicality, usability, and availability of the systems and tools described.

We received 88 submissions of abstracts for the main conference, of which the Program Committee recommended 15 to be accepted as technical communications (TCs). The Doctoral Consortium, with a separate Program Committee, received 8 submissions, all of which were finally accepted.

We are of course indebted to the members of both Program Committees and external referees for their professionalism, enthusiasm, hard work, and promptness, despite the high load of the two rounds of refereeing. The Program Committee for ICLP and the DC were:

Marcello Balduccini  Michael Codish  Fabio Fioravanti
Mutsunori Banbara  Marina De Vos  Thom Frühwirth
Roman Barták  Agostino Dovier  John Gallagher
Pedro Cabalar  Gregory Duck  Marco Gavanelli
Mats Carlsson  Esra Erdem  Martin Gebser
Manuel Carro  Wolfgang Faber  Michael Hanus
Preface

Katsumi Inoue  Francesco Ricca  Mirek Truszczyński
Gerda Janssens  Ricardo Rocha  Frank Valencia
Andy King  Neda Saiedloei  Alicia Villameva
Ekaterina Komendantskaya  Takehide Soh  Jan Wielemaker
Michael Leuschel  Zoltan Somogyi  Stefan Woltran
Vladimir Lifschitz  Harald Sondergaard  Fangkai Yang
José F. Morales  Theresa Swift  Jia-Huai You
Enrico Pontelli  Francesca Toni
Jörg Pührer  Irina Trubitsyna

The external reviewers were:

Shqiponja Ahmetaj  Daniel Gall  Charlie Ann Page
Marco Alberti  Graeme Gange  Gilberto Pérez
Dalal Alrajeh  Michael Gelfond  Carla Piazza
Bernhard Bliem  Mayer Goldberg  Christoph Redl
Carl Friedrich Bolz  Sergio Greco  Chiaki Sakama
Davide Bresolin  Amelia Harrison  Taisuke Sato
Luciano Caroprese  Laurent Janssens  Peter Schachte
Md Solimul Chowdhury  Roland Kaminski  Nada Sato
Oana Cocarascu  Benjamin Kaufmann  Takehide Soh
Giuseppe Cota  Angelika Kimmig  Tran Cao Son
Kristijonas Cytaras  Sebastian Krings  Nataliai Stulova
Alessandro Dal Palù  Evelina Lamma  Sophie Tourret
Ingmar Dasseville  Emily Leblanc  Guy Van den Broeck
Bart Demoen  Tingting Li  Matthias van der Hallen
Stefan Ellmuthaler  Morgan Magnin  Pedro Vasconcelos
Jorge Fandiño  Theofrastos Mantadelis  Germán Vidal
Johannes Klaus Fichte  Yunsong Meng  Yisong Wang
Andrea Formisano  Cristian Molinaro  Philipp Wanko
Michael Frank  Michael Morak  Antonius Weinzierl
Peng Fu  Eugenio Omodeo  Amira Zaki
Murdoch Gabbay  Max Ostrowski  Heng Zhang

We would also like to thank the full ICLP 2016 organisation committee, namely Michael Kifer and Neng-Fa Zhou, who acted as general chairs; Marcello Balduccini, who served as workshop chair; Peter Schüller, who acted as publicity chair; Paul Fodor, who organised the programming contest; and, finally, Joaquín Arias, who designed the web pages (and also raised the bar on ICLP logos).

Our gratitude must be extended to Torsten Schaub, who is serving in the role of President of the Association of Logic Programming, to all the members of the ALP Executive Committee and to Mirek Truszczyński, Editor-in-Chief of Theory and Practice of Logic Programming. Also, to the personnel at Schloss Dagstuhl – Leibniz Zentrum für Informatik, especially Marc Herbstritt, for their timely assistance. We would also like to thank Andrei Voronkov and his staff for the EasyChair system, which helped us coordinate submission, review, discussion, and notification.

Finally, we would like to thank our generous sponsors: LogicBlox Inc., Semantic Systems, The University of Texas at Dallas and, of course, the Association for Logic Programming.
Andy King was partially supported by EPSRC grant EP/N020243/1. Manuel Carro was partially supported by Comunidad de Madrid project S2013/ICE-2731 N-Greens Software and MINECO projects TIN2012-39391-C04-03 StrongSoft and TIN2015-67522-C3-1-R TRACES.
