17th Symposium on Experimental Algorithms

SEA 2018, June 27–29, 2018, L’Aquila, Italy

Edited by
Gianlorenzo D’Angelo
LIPIcs – Leibniz International Proceedings in Informatics

LIPIcs is a series of high-quality conference proceedings across all fields in informatics. LIPIcs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board
- Luca Aceto (Chair, Gran Sasso Science Institute and Reykjavik University)
- Susanne Albers (TU München)
- Chris Hankin (Imperial College London)
- Deepak Kapur (University of New Mexico)
- Michael Mitzenmacher (Harvard University)
- Madhavan Mukund (Chennai Mathematical Institute)
- Anca Muscholl (University Bordeaux)
- Catuscia Palamidessi (INRIA)
- Raimund Seidel (Saarland University and Schloss Dagstuhl – Leibniz-Zentrum für Informatik)
- Thomas Schwentick (TU Dortmund)
- Reinhard Wilhelm (Saarland University)

Contents

Preface
   Gianlorenzo D’Angelo .................................................. 0:ix

Regular Papers

Network Flow-Based Refinement for Multilevel Hypergraph Partitioning
   Tobias Heuer, Peter Sanders, and Sebastian Schlag ............................ 1:1–1:20

Aggregative Coarsening for Multilevel Hypergraph Partitioning
   Ruslan Shaydulin and Ilya Safro .............................................. 2:1–2:15

Memetic Graph Clustering
   Sonja Biedermann, Monika Henzinger, Christian Schulz, and Bernhard Schuster . 3:1–3:15

ILP-based Local Search for Graph Partitioning
   Alexandra Henzinger, Alexander Noe, and Christian Schulz ..................... 4:1–4:15

Decision Diagrams for Solving a Job Scheduling Problem Under Precedence Constraints
   Kosuke Matsumoto, Kohei Hatano, and Eiji Takimoto .............................. 5:1–5:12

Speeding up Dualization in the Fredman-Khachiyan Algorithm B
   Nafiseh Sedaghat, Tamon Stephen, and Leonid Chindelevitch ...................... 6:1–6:13

An Ambiguous Coding Scheme for Selective Encryption of High Entropy Volumes
   M. Oğuzhan Külekci ............................................................... 7:1–7:13

A $\frac{1}{3}$-Approximation Algorithm for the Student-Project Allocation Problem
   Frances Cooper and David Manlove ............................................ 8:1–8:13

How Good Are Popular Matchings?

Evaluating and Tuning n-fold Integer Programming
   Kateřina Altmanová, Dušan Knop, and Martin Kouaceký .................................. 10:1–10:14

A Computational Investigation on the Strength of Dantzig-Wolfe Reformulations
   Michael Bastubbe, Marco E. Lübbecke, and Jonas T. Witt ............................. 11:1–11:12

Experimental Evaluation of Parameterized Algorithms for Feedback Vertex Set
   Krzysztof Kiljan and Marcin Pilipczuk ............................................. 12:1–12:12

An Efficient Local Search for the Minimum Independent Dominating Set Problem

Empirical Evaluation of Approximation Algorithms for Generalized Graph Coloring and Uniform Quasi-Wideness
   Wojciech Nadara, Marcin Pilipczuk, Roman Rabinovich, Felix Reidl, and Sebastian Siebertz ......................................................... 14:1–14:16
## Contents

Multi-Level Steiner Trees  

Dictionary Matching in Elastic-Degenerate Texts with Applications in Searching VCF Files On-line  
*Solon P. Pissis and Ahmad Retha*  ................................................................. 16:1–16:14

Fast matching statistics in small space  
*Djamal Belazzougui, Fabio Cunial, and Olgert Denas*  ........................................... 17:1–17:14

Practical lower and upper bounds for the Shortest Linear Superstring  
*Bastien Cazaux, Samuel Juhel, and Eric Rivals*  ............................................. 18:1–18:14

Experimental Study of Compressed Stack Algorithms in Limited Memory Environments  
*Jean-François Baffier, Yago Diez, and Matias Korman*  ................................ 19:1–19:13

Restructuring Expression Dags for Efficient Parallelization  
*Martin Wilhelm*  ......................................................................................... 20:1–20:13

Enumerating Graph Partitions Without Too Small Connected Components Using Zero-suppressed Binary and Ternary Decision Diagrams  

Exact Algorithms for the Maximum Planar Subgraph Problem: New Models and Experiments  

A Linear-Time Algorithm for Finding Induced Planar Subgraphs  
*Shixun Huang, Zhifeng Bao, J. Shane Culpepper, Ping Zhang, and Bang Zhang*  ................................................................. 23:1–23:15

Fast Spherical Drawing of Triangulations: An Experimental Study of Graph Drawing Tools  
*Luca Castelli Aleardi, Gaspard Denis, and Éric Fusy*  ........................................ 24:1–24:14

Fleet Management for Autonomous Vehicles Using Multicommodity Coupled Flows in Time-Expanded Networks  
*Sahar Bsaybes, Alain Quilliot, and Annegret K. Wagler*  .................................. 25:1–25:14

The Steiner Multi Cycle Problem with Applications to a Collaborative Truckload Problem  
*Vinicius N. G. Pereira, Mário César San Felice, Pedro Henrique D. B. Hokama, and Eduardo C. Xavier*  ................................................. 26:1–26:13

Real-Time Traffic Assignment Using Fast Queries in Customizable Contraction Hierarchies  
*Valentin Buchhold, Peter Sanders, and Dorothea Wagner*  ................................ 27:1–27:15

Engineering Motif Search for Large Motifs  
*Petteri Kaski, Jukka Lauri, and Suhas Thejaswi*  ........................................... 28:1–28:19

Finding Hamiltonian Cycle in Graphs of Bounded Treewidth: Experimental Evaluation  
*Michal Ziobro and Marcin Pilipczuk*  .............................................................. 29:1–29:14
Isomorphism Test for Digraphs with Weighted Edges

Adolfo Piperno  ................................................................. 30:1–30:13
This volume contains papers presented at the 17th International Symposium on Experimental Algorithms (SEA 2018), held June 27–29, 2018, in L’Aquila, Italy.

Since 2002, the series of SEA symposia (previously known as Workshop on Experimental Algorithms, WEA) bring together specialists and young researchers working in experimental algorithms and algorithm engineering, encouraging high-quality research in the area. Previous WEA and SEA meetings have been held in Latvia, Switzerland, Brazil, Greece, Spain, Italy, USA, Germany, Denmark, France, Russia, and UK.

We solicited papers in the broad area of design, analysis, and experimental evaluation and engineering of algorithms, as well as of combinatorial optimization and its applications. In response to the call for papers, we received 70 submissions, with the Program Committee deciding to accept 30 papers. Each submission was reviewed by at least three program committee members with the help of several external reviewers. Papers were submitted and reviewed using the EasyChair online system. Authors of accepted papers come from 20 countries, across five continents.

In addition to the accepted contributions, the program also included three invited lectures by Dorothea Wagner (KIT), Giuseppe Italiano (University of Rome Tor Vergata), and Simon J. Puglisi (University of Helsinki).

We would like to thank all the authors who responded to the call for papers, the invited speakers, the members of the PC, the external reviewers, and the members of the Organizing Committee. We also thank the SEA steering committee for giving us the opportunity to host SEA 2018.
