■ Contents

Preface	ix
Conference Organization	xi
External Reviewers	xiii
Author Index	xvi

Invited Talks

Energy-Efficient Algorithms <i>Susanne Albers</i>	1
Constraints, Graphs, Algebra, Logic, and Complexity <i>Moshe Y. Vardi</i>	3
Physical limits of Communication <i>Madhu Sudan</i>	4
A Domain-Specific Language for Computing on Encrypted Data <i>Alex Bain, John Mitchell, Rahul Sharma, Deian Stefan and Joe Zimmerman</i>	6
Schema Mappings and Data Examples: Deriving Syntax from Semantics <i>Phokion G. Kolaitis</i>	25
Quantum State Description Complexity <i>Umesh V. Vazirani</i>	26

Contributed Papers

Session 1A

Approximation Algorithms for Union and Intersection Covering Problems <i>Marek Cygan, Fabrizio Grandoni, Stefano Leonardi, Marcin Mucha, Marcin Pilipczuk, and Piotr Sankowski</i>	28
Tight Gaps for Vertex Cover in the Sherali-Adams SDP Hierarchy <i>Siavosh Benabbas, Siu On Chan, Konstantinos Georgiou, and Avner Magen</i>	41
Applications of Discrepancy Theory in Multiobjective Approximation <i>Christian Glaßer, Christian Reitwießner, and Maximilian Witek</i>	55

Session 1B

Quasi-Weak Cost Automata: A New Variant of Weakness <i>Denis Kuperberg and Michael Vanden Boom</i>	66
Using non-convex approximations for efficient analysis of timed automata <i>Frédéric Herbretreau, Dileep Kini, B. Srivathsan, and Igor Walukiewicz</i>	78

31st Int'l Conference on Foundations of Software Technology and Theoretical Computer Science (FSTTCS 2011).
Editors: S. Chakraborty, A. Kumar

Leibniz International Proceedings in Informatics
Schloss Dagstuhl – Leibniz-Zentrum für Informatik, Dagstuhl Publishing, Germany

Shrinking Timed Automata <i>Ocan Sankur, Patricia Bouyer, and Nicolas Markey</i>	90
The Quantitative Linear-Time–Branching-Time Spectrum <i>Uli Fahrenberg, Axel Legay, and Claus Thrane</i>	103
Session 2A	
Isomorphism testing of read-once functions and polynomials <i>Raghavendra Rao B.V. and Jayalal Sarma M.N.</i>	115
The Limited Power of Powering: Polynomial Identity Testing and a Depth-four Lower Bound for the Permanent <i>Bruno Grenet, Pascal Koiran, Natacha Portier, and Yann Strozecki</i>	127
Session 2B	
Petri Net Reachability Graphs: Decidability Status of FO Properties <i>Philippe Darondeau, Stéphane Demri, Roland Meyer, and Christophe Morvan</i>	140
Approximating Petri Net Reachability Along Context-free Traces <i>Mohamed Faouzi Atig and Pierre Ganty</i>	152
Session 3A	
Minimum Fill-in of Sparse Graphs: Kernelization and Approximation <i>Fedor V. Fomin, Geevarghese Philip, and Yngve Villanger</i>	164
Cubicity, Degeneracy, and Crossing Number <i>Abhijn Adiga, L. Sunil Chandran, and Rogers Mathew</i>	176
Session 3B	
Conditional Reactive Systems <i>H. J. Sander Bruggink, Raphaël Cauderlier, Mathias Hülsbusch, and Barbara König</i>	191
Transforming Password Protocols to Compose <i>Céline Chevalier, Stéphanie Delaune, and Steve Kremer</i>	204
Session 4A	
Obtaining a Bipartite Graph by Contracting Few Edges <i>Pinar Heggernes, Pim van 't Hof, Daniel Lokshtanov, and Christophe Paul</i>	217
Simultaneously Satisfying Linear Equations Over \mathbb{F}_2 : MaxLin2 and Max- r -Lin2 Parameterized Above Average <i>Robert Crowston, Michael Fellows, Gregory Gutin, Mark Jones, Frances Rosamond, Stéphan Thomassé, and Anders Yeo</i>	229
Rainbow Connectivity: Hardness and Tractability <i>Prabhanjan Ananth, Meghana Nasre, and Kanthi K Sarpatwar</i>	241

Session 4B

Dependence logic with a majority quantifier <i>Arnaud Durand, Johannes Ebbing, Juha Kontinen, and Heribert Vollmer</i>	252
Modal Logics Definable by Universal Three-Variable Formulas <i>Emanuel Kieroński, Jakub Michaliszyn, and Jan Otop</i>	264
The First-Order Theory of Ground Tree Rewrite Graphs <i>Stefan Göller and Markus Lohrey</i>	276
Layer Systems for Proving Confluence <i>Bertram Felgenhauer, Harald Zankl, and Aart Middeldorp</i>	288

Session 5A

The Semi-stochastic Ski-rental Problem <i>Aleksander Mądry and Debmalya Panigrahi</i>	300
Streamability of Nested Word Transductions <i>Emmanuel Filiot, Olivier Gauwin, Pierre-Alain Reynier, and Frédéric Servais</i>	312
The update complexity of selection and related problems <i>Manoj Gupta, Yogish Sabharwal, and Sandeep Sen</i>	325

Session 5B

A Tight Lower Bound for Streett Complementation <i>Yang Cai and Ting Zhang</i>	339
Parameterized Regular Expressions and Their Languages <i>Pablo Barceló, Leonid Libkin, and Juan L. Reutter</i>	351
Definable Operations On Weakly Recognizable Sets of Trees <i>Jacques Duparc, Alessandro Facchini, and Filip Murlak</i>	363

Session 6

Nash Equilibria in Concurrent Games with Büchi Objectives <i>Patricia Bouyer, Romain Brenguier, Nicolas Markey, and Michael Ummels</i>	375
A Perfect-Information Construction for Coordination in Games <i>Dietmar Berwanger, Lukasz Kaiser, and Bernd Puchala</i>	387
Efficient Approximation of Optimal Control for Continuous-Time Markov Games <i>John Fearnley, Markus Rabe, Sven Schewe, and Lijun Zhang</i>	399
Minimal Disclosure in Partially Observable Markov Decision Processes <i>Nathalie Bertrand and Blaise Genest</i>	411

Session 7A

Optimal Packed String Matching
Oren Ben-Kiki, Philip Bille, Dany Breslauer, Leszek Gąsieniec, Roberto Grossi, and Oren Weimann 423

Dynamic programming in faulty memory hierarchies (cache-obliviously)
Saverio Caminiti, Irene Finocchi, Emanuele G. Fusco, and Francesco Silvestri ... 433

Session 7B

Deciding Probabilistic Simulation between Probabilistic Pushdown Automata and Finite-State Systems
Hongfei Fu and Joost-Pieter Katoen 445

Parameterised Pushdown Systems with Non-Atomic Writes
Matthew Hague 457

Higher order indexed monadic systems
Didier Caucal and Teodor Knapik 469

■ Preface

The 31st international conference on Foundations of Software Technology and Theoretical Computer Science (FSTTCS 2011) was held at Indian Institute of Technology, Bombay from December 12 to December 14, 2011. This proceedings volume contains contributed papers and (extended) abstracts of invited talks presented at the conference.

FSTTCS is the annual flagship conference of the Indian Association for Research in Computing Science (IARCS). Over the past 31 years, the conference has consistently attracted top-quality submissions, and the legacy continued this year as well. There were a total of 116 submissions, with contributing authors from 32 countries, spanning 6 continents. Most of these were high-quality papers, and the competition for making it to the final list of accepted papers was very stiff. We wish to thank all authors of submitted papers for helping make FSTTCS such a competitive conference.

The program committee, in which we had the privilege of working with 30 distinguished colleagues from 13 countries, spent almost two months reviewing and discussing in great detail the strengths and weaknesses of submitted papers. The committee also sought help from 243 external reviewers, and was able to obtain a total of 447 reviews for the contributed papers. All papers within the scope of the conference had at least 3 expert reviews, and all but a few papers were evaluated by 4 independent reviewers. Multiple rounds of elimination and intense discussions and debates followed to help us narrow down the set of papers to be accepted. A total of 37 papers were finally selected for presentation at the conference. Several very good papers had to be left out of this list owing to stiff competition. Our thanks to all members of the program committee for lending their valuable time, expertise and acumen for this significant task. Without their inputs, hard work and detailed critical comments, it would not have been possible to maintain the high standards that FSTTCS has set for itself over the years. We would also like to take this opportunity to thank all external reviewers for their detailed comments and critical assessment of papers.

Six eminent computer scientists readily agreed to travel from different parts of the world to deliver invited talks at the conference. We would like to thank Susanne Albers, Phokion G. Kolaitis, John C. Mitchell, Madhu Sudan, Moshe Y. Vardi and Umesh V. Vazirani for enriching the conference with their invited talks and with their participation. It has been our privilege to have them as part of FSTTCS 2011.

Paper submission, reviewing and program committee discussion for the conference were managed using EasyChair. We wish to thank Andrei Voronkov and the entire EasyChair team for making this excellent service available to us, and for ensuring that the reviewing, discussion and paper management processes went smoothly.

We would like to thank IIT Bombay and its administration for allowing us to use the facilities of the institute for hosting this prestigious conference in its premises. We would like to thank staff, students, post-doctoral research scholars and faculty colleagues of the Dept. of Computer Science and Engineering at IIT Bombay for pitching in myriad ways to help make the organization of the conference a success. Our special thanks go to Hrishikesh Karmarkar for ensuring that several organizational issues that threatened to spiral out of control, were eventually tamed in time. We would like to thank our student system administrators, Prajish Prasad and Jagadish M., for helping with networking and all computer system related issues. The team of project “ekalavya” at IIT Bombay, under the guidance of Prof. D.B. Phatak, readily agreed to record the proceedings of the conference, and make the recordings available in open source under a Creative Commons license. We would like to thank the

entire “ekalavya” team for lending us such a big helping hand. It is also our pleasure to acknowledge the financial support we received from IARCS and from four additional sponsors for FSTTCS 2011. These additional sponsors were: Google India Pvt. Ltd., Dept. of Computer Science and Engineering at IIT Bombay, Tata Consultancy Services and IBM India Pvt. Ltd. The institutional members of IARCS, whose contributions help support various activities of IARCS, including FSTTCS, are Geodesic Ltd., Microsoft Research India and Sasken Communication Technologies Ltd.

In addition to the technical program of the main conference, two satellite events were co-located with FSTTCS 2011. These included a pre-conference workshop on Finite and Algorithmic Model Theory and a post-conference workshop on Breakthroughs in Theoretical Computer Science. The workshop on Finite and Algorithmic Model Theory featured Anuj Dawar, Phokion G. Kolaitis, Emanuel Kieroński, Dietmar Berwanger, Benjamin Rossman and R. Ramanujam as speakers. The workshop on Breakthroughs in Theoretical Computer Science had Manindra Agrawal, Naveen Garg, Sanjeev Khanna, Aleksander Mądry, Jaikumar Radhakrishnan, Madhu Sudan, Umesh V. Vazirani, Amit Kumar and Nisheeth Vishnoi as speakers. Our thanks to all invited speakers of the two workshops for adding to the richness and diversity of the technical program.

As in the past few years, the proceedings of FSTTCS 2011 is being published as a volume in the LIPIcs series under a Creative Commons license, with free online access to all, and with authors retaining rights over their contributions. We wish to thank the editorial board of LIPIcs for agreeing to publish the current proceedings as a LIPIcs volume. Our special thanks to Marc Herbstritt for answering our deluge of questions pertaining to publishing and editing issues clearly and promptly. We gratefully acknowledge his help and the help of the entire team in the LIPIcs editorial office in preparing the final version of the proceedings.

Supratik Chakraborty and Amit Kumar
Mumbai, December 2011

■ Conference Organization

Program Chairs

Supratik Chakraborty (IIT Bombay, India)
Amit Kumar (IIT Delhi, India)

Program Committee

Luca Aceto (Reykjavik U., Iceland)	Radha Jagadeesan (DePaul U., USA)
Yossi Azar (Tel-Aviv U., Israel)	Ragesh Jaiswal (Columbia U., USA)
Mikołaj Bojańczyk (Warsaw U., Poland)	Sanjeev Khanna (U. of Pennsylvania, USA)
Krishnendu Chatterjee (IST, Austria)	K. Narayan Kumar (CMI, India)
Shuchi Chawla (U. Wisconsin-Madison, USA)	Kim G. Larsen (Aalborg U., Denmark)
Anuj Dawar (U. of Cambridge, UK)	Ashwin Nayak (U. of Waterloo, Canada)
Stephanie Delaune (LSV-ENS Cachan, France)	Madhusudan Parthasarathy (UIUC, USA)
Benjamin Doerr (MPII, Saarbrücken, Germany)	Seth Pettie (U. Michigan, Ann Arbor, USA)
Zoltán Ésik (U. of Szeged, Hungary)	S. Ramesh (GM ISL, India)
Friedrich Eisenbrand (EPFL, Switzerland)	Saket Saurabh (IMSc, India)
Javier Esparza (TU München, Germany)	Anil Seth (IIT Kanpur, India)
Martin Fränzle (U. Oldenburg, Germany)	Aravind Srinivasan (UMCP, USA)
Sariel Har-Peled (UIUC, USA)	Martin Strauss (U. Michigan, Ann Arbor, USA)
Prahladh Harsha (TIFR, India)	Ashish Tiwari (SRI International, USA)
Holger Hermanns (Saarland U., Germany)	Nisheeth K. Vishnoi (Microsoft Research, India)

Organizing Committee

Bharat Adsul (IIT Bombay, India)	Jagadish M. (IIT Bombay, India)
A. K. Bhattacharjee (BARC, India)	Jinesh Machchhar (IIT Bombay, India)
Supratik Chakraborty (IIT Bombay, India)	Ruta Mehta (IIT Bombay, India)
Ashish Chiplunkar (IIT Bombay, India)	Soumitra Pal (IIT Bombay, India)
Ayush Choure (IIT Bombay, India)	Prajish Prasad (IIT Bombay, India)
Jugal Garg (IIT Bombay, India)	Abhiram Ranade (IIT Bombay, India)
Pravin Jadhav (IIT Bombay, India)	Abhisekh Sankaran (IIT Bombay, India)
Hrishikesh Karmarkar (IIT Bombay, India)	Shetal Shah (IIT Bombay, India)
S. Krishna (IIT Bombay, India)	Chandrakant Talekar (IIT Bombay, India)
Nutan Limaye (IIT Bombay, India)
