LIPIcs – Leibniz International Proceedings in Informatics

LIPIcs is a series of high-quality conference proceedings across all fields in informatics. LIPIcs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board

- Luca Aceto (Chair, Gran Sasso Science Institute and Reykjavik University)
- Christel Baier (TU Dresden)
- Mikolaj Bojanczyk (University of Warsaw)
- Roberto Di Cosmo (INRIA and University Paris Diderot)
- Javier Esparza (TU München)
- Meena Mahajan (Institute of Mathematical Sciences)
- Dieter van Melkebeek (University of Wisconsin-Madison)
- Anca Muscholl (University Bordeaux)
- Luke Ong (University of Oxford)
- Catuscia Palamidessi (INRIA)
- Thomas Schwentick (TU Dortmund)
- Raimund Seidel (Saarland University and Schloss Dagstuhl – Leibniz-Zentrum für Informatik)

Contents

Preface
Arkadev Chattopadhyay and Paul Gastin ......................................... 0:ix

Invited Talks
Practical Formal Methods for Real World Cryptography
Karthikeyan Bhargavan and Prasad Naldurg ..................................... 1:1–1:12
Sketching Graphs and Combinatorial Optimization
Robert Krauthgamer ............................................................. 2:1–2:1
Finkel Was Right: Counter-Examples to Several Conjectures on Variants of
Vector Addition Systems
Ranko Lazić ..................................................................... 3:1–3:2
Progress in Lifting and Applications in Lower Bounds
Toniann Pitassi ................................................................. 4:1–4:1
How Computer Science Informs Modern Auction Design
Tim Roughgarden ............................................................... 5:1–5:1
An Algebraic Framework to Reason About Concurrency
Alexandra Silva ................................................................. 6:1–6:1

Regular Papers
Connected Search for a Lazy Robber
Isolde Adler, Christophe Paul, and Dimitrios M. Thilikos ................. 7:1–7:14
Parameterized Streaming Algorithms for Min-Ones \(d\)-SAT
Akansha Agrawal, Abhranil Chatterjee, Rajit Datta, and Partha Mukhopadhyay .................................. 8:1–8:20
Fast Exact Algorithms Using Hadamard Product of Polynomials
V. Arvind, Abhranil Chatterjee, Rajit Datta, and Partha Mukhopadhyay .... 9:1–9:14
Approximate Online Pattern Matching in Sublinear Time
Diptarka Chakraborty, Debarati Das, and Michal Koucký ........................ 10:1–10:15
Constructing Faithful Homomorphisms over Fields of Finite Characteristic
Prerna Chatterjee and Ramprasad Saptharishi .............................. 11:1–11:14
Maximum-Area Rectangles in a Simple Polygon
Yujin Choi, Seungjun Lee, and Hee-Kap Ahn ................................. 12:1–12:14
Motif Counting in Preferential Attachment Graphs
Jan Dreier and Peter Rossmanith ............................................. 13:1–13:14
Parameterized \(k\)-Clustering: Tractability Island
Fedor V. Fomin, Petr A. Golovach, and Kirill Simonov .................... 14:1–14:15
Nonnegative Rank Measures and Monotone Algebraic Branching Programs
Hervé Fournier, Guillaume Malod, Maud Szusterman, and Sébastien Tavenas 15:1–15:14

Unambiguous Catalytic Computation
Chetan Gupta, Rahul Jain, Vimal Raj Sharma, and Raghunath Tewari 16:1–16:13

A Fast Exponential Time Algorithm for Max Hamming Distance X3SAT
Gordon Hoi, Sanjay Jain, and Frank Stephan 17:1–17:14

Exact and Approximate Digraph Bandwidth
Pallavi Jain, Lawqueen Kanesh, William Lochet, Saket Saurabh, and Roohani Sharma 18:1–18:15

An $O(n^{1/4+\epsilon})$ Space and Polynomial Algorithm for Grid Graph Reachability
Rahul Jain and Raghunath Tewari 19:1–19:14

Popular Roommates in Simply Exponential Time
Telikepalli Kavitha 20:1–20:15

The Complexity of Finding S-Factors in Regular Graphs
Sanjana Kolisetty, Linh Le, Ilya Volkovich, and Mihalis Yannakakis 21:1–21:12

More on AC0[$\oplus$] and Variants of the Majority Function

Planted Models for k-Way Edge and Vertex Expansion
Anand Louis and Rakesh Venkat 23:1–23:15

Online Non-Preemptive Scheduling to Minimize Maximum Weighted Flow-Time on Related Machines
Giorgio Lucarelli, Benjamin Moseley, Nguyen Kim Thang, Abhinav Srivastav, and Denis Trystram 24:1–24:12

On the AC0[$\oplus$] Complexity of Andreev’s Problem
Aditya Potukuchi 25:1–25:14

The Preemptive Resource Allocation Problem
Kanthi Sarpatwar, Baruch Schieber, and Hadas Shachnai 26:1–26:15

Online and Offline Algorithms for Circuit Switch Scheduling

On the Probabilistic Degrees of Symmetric Boolean Functions

Classification Among Hidden Markov Models
S. Akshay, Hugo Bazille, Eric Fabre, and Blaise Genest 29:1–29:14

Minimisation of Event Structures
Paolo Baldan and Alessandra Raffaetà 30:1–30:15

Concurrent Parameterized Games
Nathalie Bertrand, Patricia Bouyer, and Anirban Majumdar 31:1–31:15

Expected Window Mean-Payoff
Benjamin Bordais, Shibashis Guha, and Jean-François Raskin 32:1–32:15

Interval Temporal Logic for Visibly Pushdown Systems
Laura Bozzielli, Angelo Montanari, and Adriano Peron 33:1–33:14

The 39th IARCS Annual Conference on Foundations of Software Technology and Theoretical Computer Science (FSTTCS 2019) was held at the Indian Institute of Technology Bombay, India from December 11 to December 13, 2019. In this version, a new format was introduced as the conference was formally separated into two tracks, Track-A focussing on algorithms, complexity and related issues and Track-B focussing on logic, automata and other formal methods aspects of computer science. Each track had its own Program Committee (PC) with a chair. This volume constitutes the joint proceedings of the two tracks, published in the LIPIcs series under a Creative Common license, with free online access to all.

The conference comprised of 6 invited talks, 22 contributed talks in Track-A and 23 in Track-B. This volume contains all contributed papers from both tracks and the abstracts of all invited talks presented at the conference. There were overall 93 submissions (after weeding out the obvious bogus ones), 51 in Track-A and 42 in Track-B. We thank all those who submitted to FSTTCS. We also thank all PC members for their tireless work and all external reviewers for their expert opinion in the form of timely reviews.

We are grateful to all the invited speakers: Karthikeyan Bhargavan (INRIA-Paris, France), Robert Krauthgamer (Weizmann, Israel), Ranko Lazić (Warwick, U.K.), Toniann Pitassi (Toronto, Canada), Tim Roughgarden (Columbia, U.S.) and Alexandra Silva (University College London, U.K.). They kindly accepted our invitations and gave talks that inspired the entire FSTTCS audience at large.

The main conference was preceded by two workshops on the 10th December: Complexity in Algorithmic Game Theory, organized by Siddharth Barman (IISc.) and Umang Bhaskar (TIFR), and Trends in Transformations, organized by S. Krishna (IIT Bombay). This was followed by two post-conference workshops on 14th December: Extension Complexity and Lifting Theorems, organized by Ankit Garg (MSR Bangalore), Raghu Meka (UCLA), Toniann Pitassi (Toronto) and Makrand Sinha (CWI, Amsterdam), and GALA: Gems of Automata, Logic and Algebra, organized by C. Aiswarya (CMI, Chennai), S. Akshay (IIT Bombay) and Benedikt Bollig (LSV, CNRS & ENS Paris-Saclay). Besides, there was a colocated SAT/SMT winter school from December 8th to 10th.

We are indebted to the organizing committee members from the Department of Computer Science and Engineering, IIT Bombay for ensuring a smooth running of the conference and workshops and making all necessary arrangements. We also thank S.P. Suresh of CMI for maintaining and working on the conference web page. We also thank the friendly staff at Dagstuhl LIPIcs, particularly Michael Wagner, for being prompt and helpful in answering our queries. Finally, we would also like to thank the members of the Steering Committee for having faith in us for running the conference.
