OASILcs – OpenAccess Series in Informatics

OASILcs aims at a suitable publication venue to publish peer-reviewed collections of papers emerging from a scientific event. OASILcs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board
- Daniel Cremers (TU München, Germany)
- Barbara Hammer (Universität Bielefeld, Germany)
- Marc Langheinrich (Università della Svizzera Italiana – Lugano, Switzerland)
- Dorothea Wagner (Editor-in-Chief, Karlsruher Institut für Technologie, Germany)

Contents

Preface
Marko Bertogna and Federico Terraneo ........................................... 0:vii

Invited Talk
SDN for Dynamic Reservations on Real-Time Networks
Luis Almeida ................................................................. 1:1–1:1

Regular Paper
Energy Minimization in DAG Scheduling on MPSoCs at Run-Time:
Theory and Practice
Bertrand Simon, Joachim Falk, Nicole Megow, and Jürgen Teich ............ 2:1–2:13

Bao: A Lightweight Static Partitioning Hypervisor for Modern Multi-Core
Embedded Systems
José Martins, Adriano Tavares, Marco Solieri, Marko Bertogna, and Sandro Pinto 3:1–3:14

A Low Energy FPGA Platform for Real-Time Event-Based Control
Silvano Seva, Claudia Esther Lukaschewsky Mauriziano, William Fornaciari, and Alberto Leva ...................................................... 4:1–4:11

Real-Time Task Migration for Dynamic Resource Management in
Many-Core Systems
Behnaz Pourmohseni, Fedor Smirnov, Stefan Wildermann, and Jürgen Teich .... 5:1–5:14
Preface

This volume collects the papers presented at the first edition of the Workshop on Next Generation Real-Time Embedded Systems (NG-RES 2020). The workshop is co-located with the 2020 edition of the HiPEAC conference and was held at Bologna, Italy on January 21th, 2020.

The traditional concept of embedded systems is constantly evolving to address the requirements of the modern world. Cyber-physical systems, networked control systems and Industry 4.0 are introducing an increasing need for interconnectivity. A steadily increasing algorithmic complexity of embedded software is fueling the adoption of multicore and heterogeneous architectures. As a consequence, meeting real-time requirements is now more challenging than ever. The NG-RES workshop focuses on real-time embedded systems, with particular emphasis on the distributed and parallel aspects. The workshop is a venue for both the networking and multicore real-time communities aiming at cross-fertilization and multi-disciplinary approaches to the design of embedded systems.

The scope of the NG-RES workshop include the following topics:

- Programming models, paradigms and frameworks for real-time computation on parallel and heterogeneous architectures
- Networking protocols and services (e.g., clock synchronization) for distributed real-time embedded systems
- Scheduling and schedulability analysis for distributed and/or parallel real-time systems
- Application of formal methods to distributed and/or parallel real-time systems
- Compiler-assisted solutions for distributed and/or parallel real-time systems
- Middlewares for distributed and/or parallel real-time systems

In this first edition of the workshop four regular papers were accepted, each of which receiving between two and three peer reviews. In addition, we are glad to have an invited talk by Luis Almeida titled “SDN for dynamic reservations on real-time networks”. We would like to thank the authors of the NG-RES 2020 papers, the members of our program committee, our invited speaker, our publisher Schloss Dagstuhl as well as the HiPEAC organizers for contributing to the success of this workshop.

Marko Bertogna and Federico Terraneo
Program committee

General Chair
- Marko Bertogna, Università di Modena e Reggio Emilia, Italy

Program Chair
- Federico Terraneo, Politecnico di Milano, Italy

Web and Submission Chair
- Federico Reghenzani, Politecnico di Milano, Italy

Program committee
- Jaume Abella Ferrer, Barcelona Supercomputing Center, Spain
- Benny K. Akesson, TNO, Netherlands
- Roberto Cavicchioli, Università di Modena e Reggio Emilia, Italy
- Francisco J. Cazorla, Barcelona Supercomputing Center, Spain
- Leandro Soares Indrusiak, University of York, United Kingdom
- Alberto Leva, Politecnico di Milano, Italy
- Martina Maggio, Lund University, Sweden
- Christine Rochange, Institut de Recherche en Informatique de Toulouse, France
- Alessandro Vittorio Papadopoulos, Mälardalen University, Sweden
- Marco Solieri, Università di Modena e Reggio Emilia, Italy
- Juergen Teich, Friedrich Alexander Universität, Germany
