Second Workshop on Next Generation Real-Time Embedded Systems

NG-RES 2021, January 20, 2021, Budapest, Hungary

Edited by
Marko Bertogna
Federico Terraneo
OASIcs – OpenAccess Series in Informatics

OASIcs aims at a suitable publication venue to publish peer-reviewed collections of papers emerging from a scientific event. OASIcs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board
- Daniel Cremers (TU München, Germany)
- Barbara Hammer (Universität Bielefeld, Germany)
- Marc Langheinrich (Università della Svizzera Italiana – Lugano, Switzerland)
- Dorothea Wagner (Editor-in-Chief, Karlsruher Institut für Technologie, Germany)

Contents

Preface

Marko Bertogna and Federico Terraneo ................................. 0:vii

Program committee

................................................................. 0:ix

Invited Paper

A Comparative Evaluation of Latency-Aware Energy Optimization Approaches in Many-Core Systems

Khalil Esper, Stefan Wildermann, and Jürgen Teich ......................... 1:1–1:12

Regular Papers

EDF Scheduling and Minimal-Overlap Shortest-Path Routing for Real-Time TSCH Networks

Miguel Gutiérrez Gaitán, Luís Almeida, Pedro Miguel Santos, and Patrick Meumeu Yomsi .......................................................... 2:1–2:12

Static Allocation of Basic Blocks Based on Runtime and Memory Requirements in Embedded Real-Time Systems with Hierarchical Memory Layout

Philipp Jungklass and Mladen Berekovic ........................................... 3:1–3:14

Event-Based Control Enters the Real-Time World: Perspectives and Pitfalls

Silvano Seva, William Fornaciari, and Alberto Leva ................................. 4:1–4:11

M2OS-Mc: An RTOS for Many-Core Processors

David García Villaescusa, Mario Aldea Rivas, and Michael González Harbour .... 5:1–5:13
This volume collects the papers presented at the second edition of the Workshop on Next Generation Real-Time Embedded Systems (NG-RES 2021). The workshop is co-located with the 2021 edition of the HiPEAC conference and was held on January 20th, 2021. Although the workshop was originally planned to take place at Budapest, Hungary, due to the COVID-19 pandemic it switched to a virtual online event.

The traditional concept of embedded systems is constantly evolving to address the requirements of the modern world. Cyber-physical systems, networked control systems and Industry 4.0 are introducing an increasing need for interconnectivity. A steadily increasing algorithmic complexity of embedded software is fueling the adoption of multicore and heterogeneous architectures. As a consequence, meeting real-time requirements is now more challenging than ever. The NG-RES workshop focuses on real-time embedded systems, with particular emphasis on the distributed and parallel aspects. The workshop is a venue for both the networking and multicore real-time communities aiming at cross-fertilization and multidisciplinary approaches to the design of embedded systems.

The scope of the NG-RES workshop include the following topics:

- Programming models, paradigms and frameworks for real-time computation on parallel and heterogeneous architectures
- Networking protocols and services (e.g., clock synchronization) for distributed real-time embedded systems
- Scheduling and schedulability analysis for distributed and/or parallel real-time systems
- System-level software and technologies (e.g. RTOSs, hypervisors, separation kernels, virtualization) for parallel and heterogeneous architectures
- Application of formal methods to distributed and/or parallel real-time systems
- Compiler-assisted solutions for distributed and/or parallel real-time systems
- Middlewares for distributed and/or parallel real-time systems

In this second edition of the workshop four regular papers were accepted, each of which receiving three peer reviews. In addition, we are glad to have an invited paper by Khalil Esper, Stefan Wildermann and Jürgen Teich titled “A Comparative Evaluation of Latency-Aware Energy Optimization Approaches in Many-Core Systems”. We would like to thank the authors of the NG-RES 2021 papers, the members of our program committee, our publisher Schloss Dagstuhl as well as the HiPEAC organizers for contributing to the success of this workshop.

Marko Bertogna and Federico Terraneo
Program committee

General Chair
Marko Bertogna, Università di Modena e Reggio Emilia, Italy

Program Chair
Federico Terraneo, Politecnico di Milano, Italy

Web and Submission Chair
Federico Reghenzani, Politecnico di Milano, Italy

Program committee
Alberto Leva, Politecnico di Milano, Italy
Alessandro Vittorio Papadopoulos, Mälardalen University, Sweden
Benny K. Akesson, TNO, Netherlands
Christine Rochange, Institut de Recherche en Informatique de Toulouse, France
Francisco J. Cazorla, Barcelona Supercomputing Center, Spain
Jaume Abella Ferrer, Barcelona Supercomputing Center, Spain
Lucia Lo Bello, University of Catania, Italy
Luís Almeida, Universidade do Porto, Portugal
Martina Maggio, Lund University, Sweden
Marco Solieri, Università di Modena e Reggio Emilia, Italy
Roberto Cavicchioli, Università di Modena e Reggio Emilia, Italy
