OASics – OpenAccess Series in Informatics

OASics is a series of high-quality conference proceedings across all fields in informatics. OASics volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board

- Daniel Cremers (TU München, Germany)
- Barbara Hammer (Universität Bielefeld, Germany)
- Marc Langheinrich (Università della Svizzera Italiana – Lugano, Switzerland)

■ Contents

Preface

*Christoph Garth, Jan C. Aurich, Barbara Linke, Ralf Müller, Bahram Ravani,
Gunther H. Weber, and Benjamin Kirsch* 0:vii

Regular Papers

Development and Validation of Energy Simulation for Additive Manufacturing <i>Li Yi and Jan C. Aurich</i>	1:1–1:17
Physical Modeling of Process-Machine-Interactions in Micro Machining <i>Andreas Lange, Benjamin Kirsch, Marius Heintz, and Jan C. Aurich</i>	2:1–2:20
Simulation and Application of a Piezo-Driven System Enabling Vibration-Assisted Micro Milling <i>Sebastian Greco, Katja Klauer, Benjamin Kirsch, and Jan C. Aurich</i>	3:1–3:18
Visitation Graphs: Interactive Ensemble Visualization with Visitation Maps <i>Anna-Pia Lohfink and Christoph Garth</i>	4:1–4:20
Optimized Routine of Machining Distortion Characterization Based on Gaussian Surface Curvature <i>Destiny R. Garcia, Barbara S. Linke, and Rida T. Farouki</i>	5:1–5:17
Interactive Quality Inspection of Measured Deviations in Sheet Metal Assemblies <i>Felix Claus, Hans Hagen, Viktor Leonhardt, Heike Leitte, and Bernd Hamann</i>	6:1–6:18
Influence of Flank Face Structuring on Cooling, Tool Lifetime and Borehole Quality When Drilling Inconel 718: Physical Simulations and Experimental Validation <i>Daniel Müller, Benjamin Kirsch, and Jan C. Aurich</i>	7:1–7:17
Determination of Aggregate Elastic Properties of Powder-Beds in Additive Manufacturing Using Convolutional Neural Networks <i>Ardalan R. Sofi and Bahram Ravani</i>	8:1–8:17
A Phase Field Modeling Approach of Crack Growth in Materials with Anisotropic Fracture Toughness <i>Christoph Schreiber, Tim Ettrich, Charlotte Kuhn, and Ralf Müller</i>	9:1–9:17
Is Smaller Always Better? - Evaluating Video Compression Techniques for Simulation Ensembles <i>Patrick Ruediger, Christoph Garth, Hans Hagen, and Heike Leitte</i>	10:1–10:18
Finite Element Simulation Combination to Predict the Distortion of Thin Walled Milled Aluminum Workpieces as a Result of Machining Induced Residual Stresses <i>Daniel Weber, Benjamin Kirsch, Christopher R. Chighizola, Julianne E. Jonsson, Christopher R. D'Elia, Barbara S. Linke, Michael R. Hill, and Jan C. Aurich</i>	11:1–11:21
Modeling of Nanoindentation in Ni-Graphene Nanocomposites: A Molecular Dynamics Sensitivity Study <i>Vardan Hoviki Vardanyan and Herbert M. Urbassek</i>	12:1–12:13

2nd International Conference of the DFG International Research Training Group 2057 – Physical Modeling for
Virtual Manufacturing (iPMVM 2020).

Editors: Christoph Garth, Jan C. Aurich, Barbara Linke, Ralf Müller, Bahram Ravani, Gunther Weber, and
Benjamin Kirsch

OpenAccess Series in Informatics

An Improved Particle Finite Element Method for the Simulation of Machining Processes	
<i>Xialong Ye, Juan Manuel Rodríguez Prieto, and Ralf Müller</i>	13:1–13:9
Physical Modeling of Full-Field Time-Domain Optical Coherence Tomography	
<i>Andrej Keksel, Georgis Bulun, Matthias Eifler, Anis Idrizovic, and Jörg Seewig</i> ..	14:1–14:22
Physics Simulation of Material Flows: Effects on the Performance of a Production System	
<i>Moritz Glatt, Bahram Ravani, and Jan C. Aurich</i>	15:1–15:26
Physical Modeling of Process Forces in Grinding	
<i>Praveen Sridhar, Daniel Mannherz, Rapheal Bilz, Kristin M. de Payrebrune, Mahesh R.G. Prasad, and Juan M. Rodríguez Prieto</i>	16:1–16:20
Molecular Simulation Study on the Influence of the Scratching Velocity on Nanoscopic Contact Processes	
<i>Sebastian Schmitt, Simon Stephan, Benjamin Kirsch, Jan C. Aurich, Eberhard Kerscher, Herbert M. Urbassek, and Hans Hasse</i>	17:1–17:16
The Discrete Morse Complex of Images: Algorithms, Modeling and Applications	
<i>Ricardo Dutra da Silva, Helio Pedrini, and Bernd Hamann</i>	18:1–18:19
Interpolation of Scientific Image Databases	
<i>Eric Georg Kinner, Jonas Lukasczyk, David Honegger Rogers, Ross Maciejewski, and Christoph Garth</i>	19:1–19:17

■ Preface

The International Research Training Group 2057 “Physical Modeling for Virtual Manufacturing Systems and Processes” funded by the German Research Foundation (DFG) is aimed at enabling the planning of production processes on a new level by incorporating computational and physical models. Computer models are already in use to plan production processes ranging from a single machine to a complete factory; however, these models are lacking a description of the physical properties and processes involved and thus are of limited accuracy and predictive power. In the envisioned new generation of models that include physical aspects, it will be possible to calculate key properties of a production line, such as the quality of the products or the energy consumption of a factory, in advance, and to perform targeted improvements. Within IRTG 2057, the physical interactions of the three levels factory, machine and process are considered. Toward this goal, the research agenda is driven by fundamental problems in both engineering and computers science, as well as by the integration of both. As an international program, IRTG 2057 brings together investigators and students from the three partner universities Technische Universität Kaiserslautern, University of California Davis, and University of California Berkeley.

This volume contains the proceedings of the 2nd International Conference of the IRTG 2057, conducted November 16-18, 2020 in a virtual setting. The topics considered at the conference mirror IRTG 2057’s research focus. The 19 contributions contained within this book underwent a two-stage, rigorous review by an international program committee. Submitted papers were accepted for presentation at the conference, and subsequently reviewed again before final acceptance.

We would like to express our immense gratitude to all authors that submitted a paper and the members of the program committee for their diligent work. Finally, we are indebted to the German Research Foundation (DFG, Deutsche Forschungsgemeinschaft) for continued funding and support under contract number 252408385.

■ List of Authors

Jan C. Aurich (1, 2, 3, 7, 11, 15, 17)
Institute for Manufacturing Technology and
Production Systems, Technische Universität
Kaiserslautern, Germany

Rapheal Bilz (16)
Institute of Computational Physics in
Engineering, Technische Universität
Kaiserslautern, Germany

Georgis Bulun (14)
Institute for Measurement and
Sensor-Technology, Technische Universität
Kaiserslautern, Germany

Christopher R. Chighizola (11)
Department of Mechanical and Aerospace
Engineering, University of California Davis, CA,
USA

Felix Claus  (6)
Computer Graphics & HCI Lab, Computer
Science Department, Technische Universität
Kaiserslautern, Germany

Ricardo Dutra da Silva  (18)
Department of Informatics, Federal University of
Technology, Curitiba, PR, Brazil

Kristin M. de Payrebrune (16)
Institute of Computational Physics in
Engineering, Technische Universität
Kaiserslautern, Germany

Christopher R. D'Elia (11)
Department of Mechanical and Aerospace
Engineering, University of California Davis, CA,
USA

Matthias Eifler  (14)
Institute for Measurement and
Sensor-Technology, Technische Universität
Kaiserslautern, Germany

Tim Ettrich (9)
Technische Universität Kaiserslautern, Germany

Rida T. Farouki  (5)
Mechanical and Aerospace Engineering
Department, University of California Davis, CA,
USA

Destiny R. Garcia (5)
Mechanical and Aerospace Engineering
Department, University of California Davis, CA,
USA

Christoph Garth  (4, 10, 19)
Faculty of Computer Science, Technische
Universität Kaiserslautern, Germany

Moritz Glatt  (15)
Institute for Manufacturing Technology and
Production Systems, Technische Universität
Kaiserslautern, Germany

Sebastian Greco (3)
Institute for Manufacturing Technology and
Production Systems, Technische Universität
Kaiserslautern, Germany

Hans Hagen (6, 10)
Computer Graphics & HCI Lab, Computer
Science Department, Technische Universität
Kaiserslautern, Germany

Bernd Hamann (6, 18)
Department of Computer Science, University of
California, Davis, CA 95616, USA

Hans Hasse (17)
Laboratory of Engineering Thermodynamics
(LTD), Technische Universität, Kaiserslautern,
Germany

Marius Heintz (2)
Institute for Manufacturing Technology and
Production Systems, Technische Universität
Kaiserslautern, Germany

Michael R. Hill (11)
Department of Mechanical and Aerospace
Engineering, University of California Davis, CA,
USA

Anis Idrizovic (14)
The Institute of Optics, University of Rochester,
NY, USA

Julianne E. Jonsson (11)
Department of Mechanical and Aerospace
Engineering, University of California Davis, CA,
USA

Andrej Keksel  (14)
Institute for Measurement and
Sensor-Technology, Technische Universität
Kaiserslautern, Germany

Eberhard Kerscher (17)
Materials Testing (AWP), Technische
Universität Kaiserslautern, Germany

2nd International Conference of the DFG International Research Training Group 2057 – Physical Modeling for
Virtual Manufacturing (iPMVM 2020).

Editors: Christoph Garth, Jan C. Aurich, Barbara Linke, Ralf Müller, Bahram Ravani, Gunther Weber, and
Benjamin Kirsch

- Eric Georg Kinner (19)
Faculty of Computer Science, Technische
Universität Kaiserslautern, Germany
- Benjamin Kirsch (2, 3, 7, 11, 17)
Institute for Manufacturing Technology and
Production Systems, Technische Universität
Kaiserslautern, Germany
- Katja Klauer (3)
Institute for Manufacturing Technology and
Production Systems, Technische Universität
Kaiserslautern, Germany
- Charlotte Kuhn (9)
Faculty 7, Universität Stuttgart, Germany
- Andreas Lange (2)
Institute for Manufacturing Technology and
Production Systems, Technische Universität
Kaiserslautern, Germany
- Heike Leitte (6, 10)
Visual Information Analysis, Computer Science
Department, Technische Universität
Kaiserslautern, Germany
- Viktor Leonhardt  (6)
Scientific Visualization Lab, Computer Science
Department, Technische Universität
Kaiserslautern, Germany
- Barbara S. Linke  (5, 11)
Mechanical and Aerospace Engineering
Department, University of California Davis, CA,
USA
- Anna-Pia Lohfink  (4)
Faculty of Computer Science, Technische
Universität Kaiserslautern, Germany
- Jonas Lukasczyk (19)
Arizona State University, Tempe, AZ, US
- Ross Maciejewski (19)
Arizona State University, Tempe, AZ, US
- Daniel Mannherz (16)
Institute of Computational Physics in
Engineering, Technische Universität
Kaiserslautern, Germany
- Daniel Müller (7)
Institute for Manufacturing Technology and
Production Systems, Technische Universität
Kaiserslautern, Germany
- Ralf Müller (9, 13)
Applied Mechanics, Technische Universität
Kaiserslautern, Germany
- Helio Pedrini  (18)
Institute of Computing, University of Campinas,
SP, Brazil
- Mahesh R.G. Prasad (16)
ICAMS, Ruhr-Universität Bochum, Germany
- Juan Manuel Rodríguez Prieto (13, 16)
Mechanical Engineering Department,
Universidad EAFIT, Medellín, Colombia
- Bahram Ravani (8, 15)
Department of Mechanical and Aerospace
Engineering, University of California at Davis,
CA, USA
- David Honegger Rogers (19)
Los Alamos Research Laboratory, NM, US
- Patrick Ruediger  (10)
Visual Information Analysis Group, Technische
Universität Kaiserslautern, Germany
- Sebastian Schmitt (17)
Laboratory of Engineering Thermodynamics
(LTD), Technische Universität Kaiserslautern,
Germany
- Christoph Schreiber  (9)
Applied Mechanics, Technische Universität
Kaiserslautern, Germany
- Jörg Seewig (14)
Institute for Measurement and
Sensor-Technology, Technische Universität
Kaiserslautern, Germany
- Ardalan R. Sofi (8)
Department of Mechanical and Aerospace
Engineering, University of California at Davis,
CA, USA
- Praveen Sridhar (16)
Institute of Computational Physics in
Engineering, Technische Universität
Kaiserslautern, Germany
- Simon Stephan (17)
Laboratory of Engineering Thermodynamics
(LTD), Technische Universität Kaiserslautern,
Germany
- Herbert M. Urbassek  (12, 17)
Physics Department and Research Center
OPTIMAS, Technische Universität
Kaiserslautern, Germany
- Vardan Hoviki Vardanyan (12)
Physics Department and Research Center
OPTIMAS, Technische Universität
Kaiserslautern, Germany

Daniel Weber (11)
Institute for Manufacturing Technology and
Production Systems, Technische Universität
Kaiserslautern, Germany

Xialong Ye (13)
Applied Mechanics, Technische Universität
Kaiserslautern, Germany

Li Yi  (1)
Institute for Manufacturing Technology and
Production Systems, Technische Universität
Kaiserslautern, Germany
