Fourth Workshop on Next Generation Real-Time Embedded Systems

NG-RES 2023, January 18, 2023, Toulouse, France

Edited by
Federico Terraneo
Daniele Cattaneo
OASIcs – OpenAccess Series in Informatics

OASIcs is a series of high-quality conference proceedings across all fields in informatics. OASIcs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board

- Daniel Cremers (TU München, Germany)
- Barbara Hammer (Universität Bielefeld, Germany)
- Marc Langheinrich (Università della Svizzera Italiana – Lugano, Switzerland)
- Dorothea Wagner (Editor-in-Chief, Karlsruher Institut für Technologie, Germany)

Invited Talk

Control Systems in the Presence of Computational Problems
Martina Maggio ................................................................. 1:1–1:1

Regular Papers

IRQ Coloring: Mitigating Interrupt-Generated Interference on ARM Multicore Platforms
Diogo Costa, Luca Cuomo, Daniel Oliveira, Ida Maria Savino,
Bruno Morelli, José Martins, Fabrizio Tronci, Alessandro Biasci,
and Sandro Pinto ................................................................. 2:1–2:13

Beyond the Threaded Programming Model on Real-Time Operating Systems
Erling Rennemo Jellum, Shaokai Lin, Peter Donovan, Efsane Soyer,
Fuzail Shakir, Torleiv Bryne, Milica Orlandic, Marten Lohstroh,
and Edward A. Lee .............................................................. 3:1–3:13

Efficient Abstraction of Clock Synchronization at the Operating System Level
Alessandro Sorrentino, Federico Terraneo, and Alberto Leva .................. 4:1–4:11

Response Time Analysis for RT-MQTT Protocol Grounded on SDN
Ehsan Shahri, Paulo Pedreiras, and Luis Almeida ........................................... 5:1–5:15

Throughout and Memory Optimization for Parallel Implementations of Dataflow Networks Using Multi-Reader Buffers
Martin Letras, Joachim Falk, and Jürgen Teich ........................................ 6:1–6:13

RAVEN: Reinforcement Learning for Generating Verifiable Run-Time Requirement Enforcers for MPSoCs
Khalil Esper, Jan Spieck, Pierre-Louis Sixdenier, Stefan Wildermann,
and Jürgen Teich ................................................................. 7:1–7:16
Preface

This volume collects the papers presented at the fourth edition of the Workshop on Next Generation Real-Time Embedded Systems (NG-RES 2023). The workshop is co-located with the 2023 edition of the HiPEAC conference and was held on January 18, 2023 in Toulouse, France.

The traditional concept of embedded systems is constantly evolving to address the requirements of the modern world. Cyber-physical systems, networked control systems and Industry 4.0 are introducing an increasing need for interconnectivity. A steadily increasing algorithmic complexity of embedded software is fueling the adoption of multicore and heterogeneous architectures. As a consequence, meeting real-time requirements is now more challenging than ever.

The NG-RES workshop focuses on real-time embedded systems, with particular emphasis on the distributed and parallel aspects. The workshop is a venue for both the networking and multicore real-time communities aiming at cross-fertilization and multi-disciplinary approaches to the design of embedded systems.

Topics of interest include but are not limited to:

- Application of formal methods to distributed and/or parallel real-time systems
- Programming models, paradigms and frameworks for real-time computation on parallel and heterogeneous architectures
- Applications of approximate computing in real-time systems
- Compiler-assisted solutions for distributed and/or parallel real-time systems
- Middlewares for distributed and/or parallel real-time systems
- Networking protocols and services (e.g., clock synchronization) for distributed real-time embedded systems
- Scheduling and schedulability analysis for distributed and/or parallel real-time systems
- System-level software and technologies (e.g., RTOSs, hypervisors, separation kernels, virtualization) for parallel and heterogenous architectures

In this fourth edition of the workshop six regular papers were accepted, each of which receiving two peer reviews. In addition, we are glad to have an invited talk by Martina Maggio titled “Control Systems in the presence of Computational Problems”. We would like to thank the authors of the NG-RES 2023 papers, the members of our program committee, our publisher Schloss Dagstuhl as well as the HiPEAC organizers for contributing to the success of this workshop.

Federico Terraneo and Daniele Cattaneo
Organizers of the Workshop

General Chair
- Federico Terraneo, Politecnico di Milano, Italy

Program Chair
- Daniele Cattaneo, Politecnico di Milano, Italy

Program Committee
- Luís Almeida, Universidade do Porto, Portugal
- Benny K. Akesson, TNO, Netherlands
- Ashik Ahmed Bhuiyan, University of Central Florida, United States
- Roberto Cavicchioli, Università di Modena e Reggio Emilia, Italy
- Khalil Esper, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany
- Jaume Abella Ferrer, Barcelona Supercomputing Center, Spain
- Miguel Gutierrez Gaitan, Universidade do Porto, Portugal
- Leandro Soares Indrusiak, University of York, United Kingdom
- Alberto Leva, Politecnico di Milano, Italy
- Marc Pouzet, École normale supérieure, Paris, France
- Christine Rochange, Institut de Recherche en Informatique de Toulouse, France
- Marco Solieri, Università di Modena e Reggio Emilia, Italy
- Jürgen Teich, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany
