PRINCE: Accurate Approximation of the Copy Number of Tandem Repeats <i>Mehrdad Mansouri, Julian Booth, Margaryta Vityaz, Cedric Chauve, and Leonid Chindelevitch</i>	20:1–20:13
Degenerate String Comparison and Applications <i>Mai Alzamel, Lorraine A. K. Ayad, Giulia Bernardini, Roberto Grossi, Costas S. Iliopoulos, Nadia Pisanti, Solon P. Pissis, and Giovanna Rosone</i>	21:1–21:14
A Multi-labeled Tree Edit Distance for Comparing “Clonal Trees” of Tumor Progression <i>Nikolai Karpov, Salem Malikic, Md. Khaledur Rahman, and S. Cenk Sahinalp</i>	22:1–22:19
Heuristic Algorithms for the Maximum Colorful Subtree Problem <i>Kai Dührkop, Marie A. Lataretu, W. Timothy J. White, and Sebastian Böcker</i> ...	23:1–23:14
Parsimonious Migration History Problem: Complexity and Algorithms <i>Mohammed El-Kebir</i>	24:1–24:14
The Wasserstein Distance as a Dissimilarity Measure for Mass Spectra with Application to Spectral Deconvolution <i>Szymon Majewski, Michał Aleksander Ciach, Michał Startek, Wanda Niemyska, Błażej Miasojedow, and Anna Gamin</i>	25:1–25:21

Preface

This proceedings volume contains papers presented at the 18th Workshop on Algorithms in Bioinformatics (WABI 2018), which was held at Aalto University, Helsinki, Finland, from August 20–22, 2018. WABI 2018 was one of seven conferences that were organized as part of ALGO 2018.

The Workshop on Algorithms in Bioinformatics is an annual conference established in 2001 to cover all aspects of algorithmic work in bioinformatics, computational biology, and systems biology. The workshop is intended as a forum for discrete algorithms and machine-learning methods that address important problems in molecular biology, that are founded on sound models, that are computationally efficient, and that have been implemented and tested in simulations and on real datasets. The meeting's focus is on recent research results, including significant work-in-progress, as well as identifying and exploring directions of future research.

WABI 2018 is grateful for the support to the sponsors of ALGO 2018: Federation of Finnish Learned Societies, Helsinki Institute for Information Technology HIIT, City of Helsinki, and European Association for Theoretical Computer Science (EATCS).

In 2018, a total of 57 manuscripts were submitted to WABI from which 25 were selected for presentation at the conference and are included in this proceedings volume as full papers. Extended versions of selected papers will be invited for publication in a thematic series in the journal *Algorithms for Molecular Biology* (AMB), published by BioMed Central.

The 25 papers were selected based on a thorough peer review, involving at least three independent reviewers per submitted paper, followed by discussions among the WABI Program Committee members. The selected papers cover a wide range of topics including phylogenetic studies, network analysis, sequence and genome analysis, topological data analysis and analysis of mass spectrometry data.

We thank all the authors of submitted papers and the members of the WABI Program Committee and their reviewers for their efforts that made this conference possible. We are also grateful to the WABI Steering Committee for their help and advice. We thank all the conference participants and speakers who contributed to a great scientific program. In particular, we are indebted to the keynote speaker of the conference, Mihai Pop, for his presentation. We also thank Niina Haiminen and Jarkko Toivonen as well as Päivi Lindeman and Pirjo Mulari for their help with editing the proceedings and setting up the poster session. Finally, we thank the ALGO Organizing Committee and Parinya Chalermsook, Petteri Kaski, and Jukka Suomela in particular for their hard work in making all of the local arrangements.
