■ Preface

The Annual Symposium on Combinatorial Pattern Matching (CPM) is the international research forum in the areas of combinatorial pattern matching, string algorithms and related applications. The studied objects include strings as well as trees, regular expressions, graphs, and point sets, and the goal is to design efficient algorithms and data structures based on their properties, in order to design efficient algorithmic solutions for the addressed computational problems. The problems this conference deals with include those in bioinformatics and computational biology, coding and data compression, combinatorics on words, data mining, information retrieval, natural language processing, pattern matching and discovery, string algorithms, string processing in databases, symbolic computation, and text searching and indexing. This volume contains the papers presented at the 30th Annual Symposium on Combinatorial Pattern Matching (CPM 2019) held on June 18-20, 2019 in Pisa, Italy. The conference programme includes 29 contributed papers and three invited talks by Paweł Gawrychowski (University of Wrocław, Poland), Antonio Restivo (University of Palermo, Italy), and Michal Ziv-Ukelson (Ben Gurion University of the Negev, Israel). Contributions of the invited lectures are also included in this volume. For the first time, this edition of CPM will also include the "Highlights of CPM" special session, for presenting the highlights of recent developments in combinatorial pattern matching. In this first edition we have invited Diptarka Chakraborty (Weizmann Institute of Science, Israel) to present his FOCS 2018 (best) paper "Approximating edit distance within constant factor in truly sub-quadratic time", and Nicola Prezza (University of Pisa, Italy) to present his STOC 2018 paper "At the roots of dictionary compression: string attractors". The contributed papers were selected out of 50 submissions, corresponding to an acceptance ratio of about 58%. Each submission received at least three reviews. We thank the members of the Programme Committee and all the additional external reviewers that are listed below for their hard and invaluable and collaborative work that resulted in an excellent scientific programme.

The Annual Symposium on Combinatorial Pattern Matching started in 1990, and has since then taken place every year. Previous CPM meetings were held in Paris, London (UK), Tucson, Padova, Asilomar, Helsinki, Laguna Beach, Aarhus, Piscataway, Warwick, Montreal, Jerusalem, Fukuoka, Morelia, Istanbul, Jeju Island, Barcelona, London (Ontario, Canada), Pisa, Lille, New York, Palermo, Helsinki, Bad Herrenalb, Moscow, Ischia, Tel Aviv, Warsaw, and Qingdao. From 1992 to the 2015 meeting, all proceedings were published in the LNCS (Lecture Notes in Computer Science) series. Since 2016, the CPM proceedings appear in the LIPIcs (Leibniz International Proceedings in Informatics) series, as volume 54 (CPM 2016), 78 (CPM 2017), and 105 (CPM 2018). The whole submission and review process was carried out with the help of the EasyChair conference system. We thank the CPM Steering Committee for supporting Pisa as the site for CPM 2019 and for their advice. The conference is generously hosted by the Computer Science Department of the University of Pisa. We thank Alessio Conte, Roberto Grossi, Veronica Guerrini, Giulio Pibiri, Nicola Prezza, Giovanna Rosone, Rossano Venturini (University of Pisa), and Andrea Marino (University of Florence) for their involvement and help in local arrangements. Finally, we would like to thank the MSCA RISE 2015 BIRDS Project "Bioinformatics and Information Retrieval Data Structures Analysis & Design" (GA 690941) and the UniPi PRA2017-44 Project for providing generous financial support to the conference.
