

# An Increasing Need for Formality

Martin Dixon

Intel Corp., Hillsboro, Oregon, USA

---

## Abstract

The talk will touch on a number of practical opportunities for formal modeling and methods that Intel sees in HW security research including: instruction sets; the proliferation of programmable agents within SoC's; and negative space testing.

**2012 ACM Subject Classification** Security and privacy → Security in hardware; Security and privacy → Formal methods and theory of security

**Keywords and phrases** Hardware security, formal modeling, instruction sets, SoC's, negative space testing

**Digital Object Identifier** 10.4230/LIPIcs.ITP.2019.3

**Category** Invited Talk
