LIPICs – Leibniz International Proceedings in Informatics

LIPICs is a series of high-quality conference proceedings across all fields in informatics. LIPICs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board

- Luca Aceto (*Chair*, Reykjavik University, IS and Gran Sasso Science Institute, IT)
- Christel Baier (TU Dresden, DE)
- Mikolaj Bojanczyk (University of Warsaw, PL)
- Roberto Di Cosmo (Inria and Université de Paris, FR)
- Faith Ellen (University of Toronto, CA)
- Javier Esparza (TU München, DE)
- Daniel Král' (Masaryk University - Brno, CZ)
- Meena Mahajan (Institute of Mathematical Sciences, Chennai, IN)
- Anca Muscholl (University of Bordeaux, FR)
- Chih-Hao Luke Ong (University of Oxford, GB)
- Phillip Rogaway (University of California, Davis, US)
- Eva Rotenberg (Technical University of Denmark, Lyngby, DK)
- Raimund Seidel (Universität des Saarlandes, Saarbrücken, DE and Schloss Dagstuhl – Leibniz-Zentrum für Informatik, Wadern, DE)

■ Contents

Preface	
<i>Ugo de'Liguoro, Stefano Berardi, and Thorsten Altenkirch</i>	0:vii
Regular Papers	
On Model-Theoretic Strong Normalization for Truth-Table Natural Deduction	
<i>Andreas Abel</i>	1:1–1:21
Extending Equational Monadic Reasoning with Monad Transformers	
<i>Reynald Affeldt and David Nowak</i>	2:1–2:21
Towards a Certified Reference Monitor of the Android 10 Permission System	
<i>Guido De Luca and Carlos Luna</i>	3:1–3:18
Coinductive Proof Search for Polarized Logic with Applications to Full Intuitionistic Propositional Logic	
<i>José Espírito Santo, Ralph Matthes, and Luís Pinto</i>	4:1–4:24
Synthetic Completeness for a Terminating Seligman-Style Tableau System	
<i>Asta Halkjær From</i>	5:1–5:17
Encoding of Predicate Subtyping with Proof Irrelevance in the $\lambda\Pi$ -Calculus Modulo Theory	
<i>Gabriel Hondet and Frédéric Blanqui</i>	6:1–6:18
Λ -Symsym: An Interactive Tool for Playing with Involutions and Types	
<i>Furio Honsell, Marina Lenisa, and Ivan Scagnetto</i>	7:1–7:18
Why Not W?	
<i>Jasper Hugunin</i>	8:1–8:9
Subtype Universes	
<i>Harry Maclean and Zhaohui Luo</i>	9:1–9:16
Two Applications of Logic Programming to Coq	
<i>Matteo Manighetti, Dale Miller, and Alberto Momigliano</i>	10:1–10:19
Duality in Intuitionistic Propositional Logic	
<i>Paweł Urzyczyn</i>	11:1–11:10

■ Preface

This volume constitutes the post-proceedings of the 26th International Conference on Types for Proofs and Programs, TYPES 2020, that was planned in Turin from the 2nd to the 5th of March 2020. The TYPES meetings are a forum to present new and on-going work in all aspects of type theory and its applications, especially in formalised and computer assisted reasoning and computer programming. The meetings from 1990 to 2008 were annual workshops of a sequence of five EU-funded networking projects. Since 2009, TYPES has been run as an independent conference series. Previous TYPES meetings were held in Antibes (1990), Edinburgh (1991), Båstad (1992), Nijmegen (1993), Båstad (1994), Torino (1995), Aussois (1996), Kloster Irsee (1998), Lökeberg (1999), Durham (2000), Bergen near Nijmegen (2002), Torino (2003), Jouy-en-Josas near Paris (2004), Nottingham (2006), Cividale del Friuli (2007), Torino (2008), Aussois (2009), Warsaw (2010), Bergen (2011), Toulouse (2013), Paris (2014), Tallinn (2015), Novi Sad (2016), Budapest (2017), Braga (2018) and Oslo (2019).

The TYPES areas of interest include, but are not limited to: foundations of type theory and constructive mathematics; applications of type theory; dependently typed programming; industrial uses of type theory technology; meta-theoretic studies of type systems; proof assistants and proof technology; automation in computer-assisted reasoning; links between type theory and functional programming; formalizing mathematics using type theory. The TYPES conferences are of open and informal character. Selection of contributed talks is based on short abstracts; reporting work in progress and work presented or published elsewhere is welcome. A formal post-proceedings volume is prepared after the conference; papers submitted to that volume must represent unpublished work and are subjected to a full peer-review process.

Due to the COVID-19 outbreak, in 2020 the conference did not take place; the abstracts of contributed talks are available from: <https://types2020.di.unito.it/>. Nonetheless the steering committee decided to have TYPES 2020 post-proceedings published. After a new call and a thorough peer-review procedure, 11 submissions could be accepted for publication. We thank all authors and reviewers for their contribution to this volume.

Ugo de'Liguoro, Stefano Berardi and Thorsten Altenkirch, June 2021
