■ Preface

This volume contains the papers that were presented at the 2nd Symposium on Algorithmic Foundations of Dynamic Networks, held in Pisa, Italy, June 19–21, 2023.

The Symposium on Algorithmic Foundations of Dynamic Networks (SAND) is a new conference whose objective is to become the primary venue for original research on fundamental aspects of computing in dynamic networks and computational dynamics, bringing together researchers from computer science and related areas. SAND is seeking important contributions from all viewpoints, including theory and practice, characterized by a marked algorithmic aspect and addressing or being motivated by the role of dynamics in computing. It welcomes both conceptual and technical contributions, as well as novel ideas and new problems that will inspire the community and facilitate the further growth of the area.

The program committee of SAND 2022 consisted of

- David Doty (University of California, Davis, USA, co-chair),
- Paul Spirakis (University of Liverpool, UK, co-chair),
- Mostefaoui Achour (Université de Nantes, France),
- Hagit Attiya (Technion, Israel),
- Petra Berenbrink (Universität Hamburg, Germany),
- Silvia Bonomi (Sapienza Università di Roma, Italy),
- Janna Burman (Université Paris-Saclay, France),
- Arnaud Casteigts (University of Bordeaux, France),
- Ho-Lin Chen (National Taiwan University),
- Giuseppe Di Luna (Sapienza Università di Roma, Italy),
- Mahsa Eftekhari (Microsoft, USA),
- Jessica Enright (University of Glasgow, UK),
- Javier Esparza (Technische Universität München, Germany),
- Pierre Fraigniaud (CNRS, France),
- Leszek Gasieniec (University of Liverpool, UK),
- Chryssis Georgiou (University of Cyprus),
- Peter Kling (Universität Hamburg, Germany),
- Dariusz Kowalski (Augusta University, USA),
- Marios Mavronicolas (University of Cyprus),
- George Mertzios (Durham University, UK),
- Othon Michail (University of Liverpool, UK),
- Slobodan Mitrović (University of California, Davis, USA),
- Sotiris Nikolettseas (Patras University, Greece),
- Thomas Nowak (Université Paris-Saclay, France),
- Giuseppe Prencipe (University of Pisa, Italy),
- Andrea Richa (Arizona State University, USA),
- Elad Schiller (Chalmers University of Technology, Sweden),
- Stefan Schmid (Technische Universität Berlin, Germany),
- George Skretas (Hasso Plattner Institute, Germany),
- Yuichi Sudo (Hosei University, Japan),
- Przemysław Uznański (University of Wrocław, Poland),
- Hirozumi Yamaguchi (Osaka University, Japan),
- Yukiko Yamauchi (Kyushu University, Japan).

2nd Symposium on Algorithmic Foundations of Dynamic Networks (SAND 2023).

Editors: David Doty and Paul Spirakis

Leibniz International Proceedings in Informatics
LIPIC Schloss Dagstuhl – Leibniz-Zentrum für Informatik, Dagstuhl Publishing, Germany

SAND 2023 received 20 submissions. The review process was double-blind and each paper was assigned to at least three members of the program committee with relevant expertise and eventually reviewed by them and/or by additional reviewers whenever needed. The program committee accepted 14 papers that cover a wide range of topics in the broad area of algorithmic foundations of dynamic networks and computational dynamics, including DNA self-assembly, dynamic networks and distributed algorithms, mobile computing and robotics, and temporal and dynamic graph algorithms. Keynote talks were given by distinguished researchers, to whom we are grateful: Fabian Kuhn (Albert-Ludwigs-Universität), Kitty Meeks (University of Glasgow), and Nicola Santoro (Carleton University).

The program committee selected the paper “*When Should You Wait Before Updating? – Toward a Robustness Refinement*” by Swan Dubois, Laurent Feuilloley, Franck Petit and Mikael Rabie, for the Best Paper Award and the paper “*Snapshot Disjointness in Temporal Graphs*” by Allen Ibiapina and Ana Silva, for the Best Student Paper Award. We wish to thank the members of the various committees of SAND as well as its advisory board, for all the hard work that they have put and which has made it possible to set up a new conference. All have been supportive throughout. We are grateful to the program committee members and to the additional reviewers for devoting time and effort in order to come up with a strong conference program. A special thanks goes to the general chair of the organizing committee, Giuseppe Prencipe, and organizing committee members Silvia Filogna and Samuele Bonini. We are also indebted to the chair of the SAND steering committee, Paola Flocchini, for all her support, to Giuseppe Prencipe for handling all the financial aspects, and to George Skretas for helping on publicity matters.

Above all, we thank the authors for submitting their work to SAND 2023. We can assure the reader that in this volume they will find well-presented ideas and results that make substantial contributions to our knowledge on the role of dynamics in computing. We do believe that this volume will inspire further work and will contribute to the further growth of this exciting research area.

June, 2023

David Doty and Paul Spirakis

■ List of Authors

Robert M. Alaniz (12)
Department of Computer Science, University
of Texas Rio Grande Valley, TX, USA

Joshua Ani (5)
Computer Science and Artificial Intelligence
Laboratory, Massachusetts Institute of
Technology, Cambridge, MA, USA

Luca Becchetti (3)
Sapienza University of Rome, Italy

Thomas Bellitto (13)
Sorbonne Université, CNRS, LIP6, F-75005
Paris, France

Jan Boeckmann  (9)
TUM Campus Straubing for Biotechnology
and Sustainability, Hochschule
Weihenstephan-Triesdorf, Germany

Vincent Bridonneau (8)
Université Le Havre Normandie, Normandie
Univ, LITIS EA 4108, 76600 Le Havre, France

Filippo Brunelli (4)
Université Paris Cité, Inria, CNRS, IRIF,
Paris, France

David Caballero (12)
Department of Computer Science, University
of Texas Rio Grande Valley, TX, USA

Bernard Chazelle  (10)
Department of Computer Science,
Princeton University, NJ, USA

Markus Chimani  (14)
Theoretical Computer Science,
Universität Osnabrück, Germany

Andrea Clementi (3)
University of Rome Tor Vergata, Italy

Johanne Cohen  (11)
Université Paris-Saclay, CNRS, LISN, 91405,
Orsay, France

Cyril Conchon-Kerjan (13)
DIENS, Ecole normale supérieure,
F-75005 Paris, France

Michael Coulombe (5)
Computer Science and Artificial Intelligence
Laboratory, Massachusetts Institute of
Technology, Cambridge, MA, USA

Erik D. Demaine (5)
Computer Science and Artificial Intelligence
Laboratory, Massachusetts Institute of
Technology, Cambridge, MA, USA

Yevhenii Diomidov (5)
Computer Science and Artificial Intelligence
Laboratory, Massachusetts Institute of
Technology, Cambridge, MA, USA

Swan Dubois  (7)
Sorbonne Université, CNRS, LIP6, DELYS,
Paris, France

Ryota Eguchi  (2)
NAIST, Nara, Japan

Bruno Escoffier (13)
Sorbonne Université, CNRS, LIP6, F-75005
Paris, France; Institut Universitaire de France,
Paris, France

Laurent Feuilloley  (7)
Univ Lyon, CNRS, INSA Lyon, UCBL, LIRIS,
UMR5205, Villeurbanne, France

Timothy Gomez (5, 12)
Computer Science and Artificial Intelligence
Laboratory, Massachusetts Institute of
Technology, Cambridge, MA, USA

Elise Grizzell (12)
Department of Computer Science, University
of Texas Rio Grande Valley, TX, USA

Frédéric Guinand  (8)
Université Le Havre Normandie, Normandie
Univ, LITIS EA 4108, 76600 Le Havre, France

Dylan Hendrickson (5)
Computer Science and Artificial Intelligence
Laboratory, Massachusetts Institute of
Technology, Cambridge, MA, USA

Allen Ibiapina  (1)
