LIPICs – Leibniz International Proceedings in Informatics

LIPICs is a series of high-quality conference proceedings across all fields in informatics. LIPICs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board

- Luca Aceto (Reykjavik University, IS and Gran Sasso Science Institute, IT)
- Christel Baier (TU Dresden, DE)
- Roberto Di Cosmo (Inria and Université Paris Cité, FR)
- Faith Ellen (University of Toronto, CA)
- Javier Esparza (TU München, DE)
- Daniel Král' (Masaryk University, Brno, CZ)
- Meena Mahajan (*Chair*, Institute of Mathematical Sciences, Chennai, IN)
- Anca Muscholl (University of Bordeaux, FR)
- Chih-Hao Luke Ong (Nanyang Technological University, SG)
- Phillip Rogaway (University of California, Davis, US)
- Eva Rotenberg (Technical University of Denmark, Lyngby, DK)
- Raimund Seidel (Universität des Saarlandes, Saarbrücken, DE and Schloss Dagstuhl – Leibniz-Zentrum für Informatik, Wadern, DE)
- Pierre Senellart (ENS, Université PSL, Paris, FR)

Preface	
<i>Solon P. Pissis and Wing-Kin Sung</i>	0:vii
WABI 2024 Committees	
.....	0:ix

Invited Talk

Bioinformatics of Pathogens	
<i>Tomáš Vinař</i>	1:1–1:2

Regular Papers

On the Complexity of the Median and Closest Permutation Problems	
<i>Luís Cunha, Ignasi Sau, and Uéverton Souza</i>	2:1–2:23
An Efficient Algorithm for the Reconciliation of a Gene Network and Species Tree	
<i>Yao-ban Chan</i>	3:1–3:17
MEM-Based Pangenome Indexing for k -mer Queries	
<i>Stephen Hwang, Nathaniel K. Brown, Omar Y. Ahmed, Katharine M. Jenike, Sam Kovaka, Michael C. Schatz, and Ben Langmead</i>	4:1–4:17
Memoization on Shared Subtrees Accelerates Computations on Genealogical Forests	
<i>Lukas Hübner and Alexandros Stamatakis</i>	5:1–5:22
Cosine Similarity Estimation Using FracMinHash: Theoretical Analysis, Safety Conditions, and Implementation	
<i>Mahmudur Rahman Hera and David Koslicki</i>	6:1–6:16
Sapling: Inferring and Summarizing Tumor Phylogenies from Bulk Data Using Backbone Trees	
<i>Yuan Yuan Qi and Mohammed El-Kebir</i>	7:1–7:19
Applying the Safe-And-Complete Framework to Practical Genome Assembly	
<i>Sebastian Schmidt, Santeri Toivonen, Paul Medvedev, and Alexandru I. Tomescu</i>	8:1–8:16
Orientability of Undirected Phylogenetic Networks to a Desired Class: Practical Algorithms and Application to Tree-Child Orientation	
<i>Tsuyoshi Urata, Manato Yokoyama, and Momoko Hayamizu</i>	9:1–9:17
b-move: Faster Bidirectional Character Extensions in a Run-Length Compressed Index	
<i>Lore Depuydt, Luca Renders, Simon Van de Vyver, Lennart Veys, Travis Gagie, and Jan Fostier</i>	10:1–10:18
The mod-minimizer: A Simple and Efficient Sampling Algorithm for Long k -mers	
<i>Ragnar Groot Koerkamp and Giulio Ermanno Pibiri</i>	11:1–11:23

24th International Workshop on Algorithms in Bioinformatics (WABI 2024).

Editors: Solon P. Pissis and Wing-Kin Sung

Leibniz International Proceedings in Informatics

Schloss Dagstuhl – Leibniz-Zentrum für Informatik, Dagstuhl Publishing, Germany

Reconstructing Rearrangement Phylogenies of Natural Genomes <i>Leonard Bohnenkämper, Jens Stoye, and Daniel Dörr</i>	12:1–12:16
PLA-index: A k -mer Index Exploiting Rank Curve Linearity <i>Md. Hasin Abrar and Paul Medvedev</i>	13:1–13:18
A Unifying Taxonomy of Pattern Matching in Degenerate Strings and Founder Graphs <i>Rocco Ascone, Giulia Bernardini, Alessio Conte, Massimo Equi, Esteban Gabory, Roberto Grossi, and Nadia Pisanti</i>	14:1–14:21
Swiftly Identifying Strongly Unique k -Mers <i>Jens Zentgraf and Sven Rahmann</i>	15:1–15:15
Finding Maximum Common Contractions Between Phylogenetic Networks <i>Bertrand Marchand, Nadia Tahiri, Olivier Tremblay-Savard, and Manuel Lafond</i>	16:1–16:24
A*PA2: Up to $19\times$ Faster Exact Global Alignment <i>Ragnar Groot Koerkamp</i>	17:1–17:25
RNA Triplet Repeats: Improved Algorithms for Structure Prediction and Interactions <i>Kimon Boehmer, Sarah J. Berkemer, Sebastian Will, and Yann Ponty</i>	18:1–18:23
RNA Inverse Folding Can Be Solved in Linear Time for Structures Without Isolated Stacks or Base Pairs <i>Théo Boury, Laurent Bulteau, and Yann Ponty</i>	19:1–19:23
The Path-Label Reconciliation (PLR) Dissimilarity Measure for Gene Trees <i>Alitzel López Sánchez, José Antonio Ramírez-Rafael, Alejandro Flores-Lamas, Maribel Hernández-Rosales, and Manuel Lafond</i>	20:1–20:21
MCDAG: Indexing Maximal Common Subsequences in Practice <i>Giovanni Buzzega, Alessio Conte, Roberto Grossi, and Giulia Punzi</i>	21:1–21:18
Anchorage Accurately Assembles Anchor-Flanked Synthetic Long Reads <i>Xiaofei Carl Zang, Xiang Li, Kyle Metcalfe, Tuval Ben-Yehzekel, Ryan Kelley, and Mingfu Shao</i>	22:1–22:17
AlfaPang: Alignment Free Algorithm for Pangenome Graph Construction <i>Adam Cicherski, Anna Lisiecka, and Norbert Dojer</i>	23:1–23:18

■ Preface

This proceedings volume contains papers and abstracts presented at the 24th Workshop on Algorithms in Bioinformatics (WABI 2024), which was held in Egham, United Kingdom, from September 2nd to 4th, 2024.

The Workshop on Algorithms in Bioinformatics is an annual conference established in 2001 to cover all aspects of algorithmic work in bioinformatics, computational biology, and systems biology. The conference serves as a forum for presenting new insights about discrete algorithms and machine-learning methods that address important problems in biology, particularly those based on molecular data and phenomena. These algorithms are founded on sound models, exhibit computational efficiency, and have been implemented and tested in simulations and on real datasets. The focus of the meeting is on recent research results, including significant work-in-progress, as well as identifying and exploring directions for future research. Over the 24 instances of WABI, computational biology has significantly grown in importance. Some of these methods have been applied in different biological and clinical domains like vaccine development.

WABI 2024 was co-located with ALGO 2024. A total of 46 manuscripts were submitted to WABI 2024, of which 22 were selected for presentation at the conference and included in this proceedings volume as full papers. The 22 papers chosen for the conference underwent a rigorous peer review process, involving at least four independent reviewers per submitted paper. Following this, discussions took place among the WABI 2024 Program Committee members. The reviews were conducted by both Program Committee members and additional reviewers selected based on their expertise relevant to specific papers. The selected papers encompass a wide range of topics, including phylogenetic trees and networks, cancer phylogenetics, sequence alignment and assembly, gene and genomic-level evolution, genome rearrangement, sequence and genome analysis, RNA structure, pattern matching, data compression, and more. The conference program also featured an invited talk. The EasyChair system was utilized for handling submissions and reviews.

Extended versions of selected papers have been invited for publication in a thematic series in the journal “Algorithms for Molecular Biology” (AMB), published by BioMed Central.

We extend our gratitude to all the authors of the submitted papers, whose contributions made this conference possible. Special thanks are due to all the members of the WABI 2024 Program Committee and their sub-reviewers for their diligent efforts in reviewing the manuscripts and engaging in comprehensive discussions. These discussions informed the decision-making process and resulted in constructive review reports for the authors. We are grateful to the WABI Steering Committee for their availability, assistance, and guidance. Our thanks go to all the conference participants, session chairs, and speakers who contributed to a highly successful scientific program. In particular, we express our gratitude to the conference’s keynote speaker, Tomáš Vinař (Comenius University in Bratislava, Slovakia), for his presentation titled “Bioinformatics of Pathogens”. Furthermore, we would like to express our special appreciation to the ALGO 2024 Organizing Committee for their dedicated efforts and generosity in organizing the event.

Previous WABI proceedings appeared in LNCS/LNBI volumes as follows: 2149 (WABI 2001, Aarhus), 2452 (WABI 2002, Rome), 2812 (WABI 2003, Budapest), 3240 (WABI 2004, Bergen), 3692 (WABI 2005, Mallorca), 4175 (WABI 2006, Zurich), 4645 (WABI 2007, Philadelphia), 5251 (WABI 2008, Karlsruhe), 5724 (WABI 2009, Philadelphia), 6293 (WABI 2010, Liverpool), 6833 (WABI 2011, Saarbrücken), 7534 (WABI 2012, Ljubljana), 8126

24th International Workshop on Algorithms in Bioinformatics (WABI 2024).
