## OASIcs – OpenAccess Series in Informatics

OASIcs aims at a suitable publication venue to publish peer-reviewed collections of papers emerging from a scientific event. OASIcs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

# Contents

Preface <i>Christine Choppy and Jun Sun</i> .....	vii
--	-----

## Invited Talks

Control of Switching Systems by Invariance Analysis <i>Laurent Fribourg</i> .....	1
Specification, Verification and Inference <i>Wei-Ngan Chin</i> .....	2

## Regular Papers

Analysis of Two-Layer Protocols: DCCP Simultaneous-Open and Hole Punching Procedures <i>Somsak Vanit-Anunchai</i> .....	3
Dynamic Clock Elimination in Parametric Timed Automata <i>Étienne André</i> .....	18
On the Determinism of Multi-core Processors <i>Vladimir-Alexandru Paun, Bruno Monsuez, and Philippe Baufreton</i> .....	32

## PhD Papers

An Improved Construction of Petri Net Unfoldings <i>César Rodríguez and Stefan Schwoon</i> .....	47
Constructing Attractors of Nonlinear Dynamical Systems by State Space Decomposition <i>Laurent Fribourg, Ulrich Kühne, and Romain Soulat</i> .....	53
Formal Modelling and Verification of Pervasive Computing Systems <i>Yan Liu</i> .....	61
Illustrating the Mezzo Programming Language <i>Jonathan Protzenko</i> .....	68
Improving System-Level Verification of SystemC Models with SPIN <i>Martin Elshuber, Susanne Kandl, and Peter Puschner</i> .....	74
Modelling and Reasoning about Dynamic Networks as Concurrent Systems <i>Yanti Rusmawati and David Rydeheard</i> .....	80
Safety of Unmanned Aircraft Systems Facing Multiple Breakdowns <i>Patrice Carle, Christine Choppy, Romain Kervarc, and Ariane Piel</i> .....	86

## Preface

We are pleased to present the proceedings of the 1st French Singaporean Workshop in Formal Methods and Applications (FSFMA) which will take place on July 15–16th, 2013 in Singapore, as a satellite event before the Eighteenth International Conference on Engineering of Complex Computer Systems (ICECCS 2013).

FSFMA 2013 aims at sharing research interests and launching collaborations in the area of formal methods and their applications. The scientific subject of the workshop covers areas such as formal specification, model checking, verification, program analysis/transformation, software engineering, and applications in major areas of computer science, including aeronautics and aerospace. It is hoped that this workshop will help to establish links between academic and industry scientists interested in methods and techniques for constructing reliable systems using formal methods.

The workshop consists in two keynote talks, the presentation of peer-reviewed papers (there are regular papers and PhD papers), and two panel discussions.

The keynote speakers are Laurent Fribourg (LSV, France), and Wei-Ngan Chin (NUS, Singapore). Laurent Fribourg is head of the Laboratoire de Spécification et Vérification (ENS de Cachan & CNRS, France), and his talk is about the use of formal techniques to analyse properties of dynamic systems. Wei-Ngan Chin is Associate Professor in the Department of Computer Science, National University of Singapore, and his talk is about improving the specification and verification processes.

The panel discussions will be on applications of formal methods, and on collaborations between academic and industry, in different countries.

We received 22 submissions (3 were removed, 10 regular papers and 9 PhD session papers), and selected 10 papers (3 regular papers, and 7 PhD session papers).

FSFMA 2013 is funded by the Merlion programme of the French Institute in Singapore of the French embassy in Singapore. The workshop is partially funded by the French Institute and the Singapore University of Technology and Design, with the additional support of the Laboratoire d’Informatique de Paris Nord (Sorbonne Paris Cité, Université Paris 13 & CNRS UMR 7030, France), the Nanyang Technology University (Singapore), the National University of Singapore (Singapore), and the kind participation of the Laboratoire de Spécification et Vérification (ENS de Cachan & CNRS, France).

We would like to thank all program committee members, subreviewers, authors and participants for their involvement to the success of the workshop. We would also like to warmly thank Aurélie Martin, Florent Beau and Pascal Loubière, from the French Institute in Singapore, for their helpful support.

Christine Choppy and Jun Sun  
*Chairs of FSFMA 2013*

## List of Authors

Étienne André  
Université Paris 13, Sorbonne Paris Cité,  
LIPN, CNRS UMR 7030  
93430 Villeurbanne, France  
Etienne.Andre@univ-paris13.fr

Philippe Baufreton  
Sagem - SAFRAN Electronics  
91344 MASSY Cedex France

Patrice Carle

# ■ Program Committee

## Chairs

Christine Choppy  
Université Paris 13, Sorbonne Paris Cité,  
CNRS UMR 7030, France

Jun Sun  
Singapore University of Technology and  
Design, Singapore

Charles Lakos  
University of Adelaide, Australia

Yang Liu  
Nanyang Technological University, Singapore

Hadj-Alouane Nejib  
ENIT Tunis, Tunisia

Geguang Pu  
East China Normal University, China

## PhD Session Chairs

Étienne André  
Université Paris 13, Sorbonne Paris Cité,  
CNRS UMR 7030, France

Yang Liu  
Nanyang Technological University, Singapore

Shengchao Qin  
University of Teesside, Middlesbrough, U.K

Gianna Reggio  
DIBRIS, Genova, Italy

Jun Sun  
Singapore University of Technology and  
Design, Singapore

Naijun Zhang  
Chinese Academy of Sciences, China

## Program Committee

Étienne André  
Université Paris 13, Sorbonne Paris Cité,
