OASlcs – OpenAccess Series in Informatics

OASlcs aims at a suitable publication venue to publish peer-reviewed collections of papers emerging from a scientific event. OASlcs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board

- Daniel Cremers (TU München, Germany)
- Barbara Hammer (Universität Bielefeld, Germany)
- Marc Langheinrich (Università della Svizzera Italiana – Lugano, Switzerland)
- Dorothea Wagner (*Editor-in-Chief*, Karlsruher Institut für Technologie, Germany)

ISSN 1868-8969

■ Contents

Preface	
<i>Marko Bertogna and Federico Terraneo</i>	0:vii
Program committee	
.....	0:ix

Invited Paper

A Comparative Evaluation of Latency-Aware Energy Optimization Approaches in Many-Core Systems	
<i>Khalil Esper, Stefan Wildermann, and Jürgen Teich</i>	1:1–1:12

Regular Papers

EDF Scheduling and Minimal-Overlap Shortest-Path Routing for Real-Time TSCH Networks	
<i>Miguel Gutiérrez Gaitán, Luís Almeida, Pedro Miguel Santos, and Patrick Meumeu Yomsí</i>	2:1–2:12
Static Allocation of Basic Blocks Based on Runtime and Memory Requirements in Embedded Real-Time Systems with Hierarchical Memory Layout	
<i>Philipp Jungklass and Mladen Berekovic</i>	3:1–3:14
Event-Based Control Enters the Real-Time World: Perspectives and Pitfalls	
<i>Silvano Seva, William Fornaciari, and Alberto Leva</i>	4:1–4:11
M2OS-Mc: An RTOS for Many-Core Processors	
<i>David García Villaescusa, Mario Aldea Rivas, and Michael González Harbour</i>	5:1–5:13

■ Preface

This volume collects the papers presented at the second edition of the Workshop on Next Generation Real-Time Embedded Systems (NG-RES 2021). The workshop is co-located with the 2021 edition of the HiPEAC conference and was held on January 20th, 2021. Although the workshop was originally planned to take place at Budapest, Hungary, due to the COVID-19 pandemic it switched to a virtual online event.

The traditional concept of embedded systems is constantly evolving to address the requirements of the modern world. Cyber-physical systems, networked control systems and Industry 4.0 are introducing an increasing need for interconnectivity. A steadily increasing algorithmic complexity of embedded software is fueling the adoption of multicore and heterogeneous architectures. As a consequence, meeting real-time requirements is now more challenging than ever. The NG-RES workshop focuses on real-time embedded systems, with particular emphasis on the distributed and parallel aspects. The workshop is a venue for both the networking and multicore real-time communities aiming at cross-fertilization and multi-disciplinary approaches to the design of embedded systems.

The scope of the NG-RES workshop include the following topics:

- Programming models, paradigms and frameworks for real-time computation on parallel and heterogeneous architectures
- Networking protocols and services (e.g., clock synchronization) for distributed real-time embedded systems
- Scheduling and schedulability analysis for distributed and/or parallel real-time systems
- System-level software and technologies (e.g. RTOSs, hypervisors, separation kernels, virtualization) for parallel and heterogeneous architectures
- Application of formal methods to distributed and/or parallel real-time systems
- Compiler-assisted solutions for distributed and/or parallel real-time systems
- Middlewares for distributed and/or parallel real-time systems

In this second edition of the workshop four regular papers were accepted, each of which receiving three peer reviews. In addition, we are glad to have an invited paper by Khalil Esper, Stefan Wildermann and Jürgen Teich titled “A Comparative Evaluation of Latency-Aware Energy Optimization Approaches in Many-Core Systems”. We would like to thank the authors of the NG-RES 2021 papers, the members of our program committee, our publisher Schloss Dagstuhl as well as the HiPEAC organizers for contributing to the success of this workshop.

Marko Bertogna and Federico Terraneo

■ Program committee

General Chair

- Marko Bertogna, Università di Modena e Reggio Emilia, Italy

Program Chair

- Federico Terraneo, Politecnico di Milano, Italy

Web and Submission Chair

- Federico Reghenzani, Politecnico di Milano, Italy

Program committee

- Alberto Leva, Politecnico di Milano, Italy
- Alessandro Vittorio Papadopoulos, Mälardalen University, Sweden
- Benny K. Akesson, TNO, Netherlands
- Christine Rochange, Institut de Recherche en Informatique de Toulouse, France
- Francisco J. Cazorla, Barcelona Supercomputing Center, Spain
- Jaume Abella Ferrer, Barcelona Supercomputing Center, Spain
- Lucia Lo Bello, University of Catania, Italy
- Luís Almeida, Universidade do Porto, Portugal
- Martina Maggio, Lund University, Sweden
- Marco Solieri, Università di Modena e Reggio Emilia, Italy
- Roberto Cavicchioli, Università di Modena e Reggio Emilia, Italy
